# About This Document

---

## Software Version

The following table lists the versions of the mapping engine of the SA-SDB(Service Awareness-Signature Database).

Engine Name	Version
SA-Engine	V300R007C20
	V300R008C10
	V300R009C10

## Version Mapping

The following table lists versions of the mapping products of the SA-SDB.

Product Name	Version Mapping
NGFW	V100R001C10
	V100R001C20
	V100R001C30
	V500R001C00
	V500R001C20
	V500R001C30

## Intended Audience

This document is intended for:

- Network Planning Engineer
- Commissioning Engineer
- Data Configuration Engineer
- System Maintenance Engineer

## Symbol Conventions

The symbols that may be found in this document are defined as follows.

Symbol	Description
 <b>DANGER</b>	Indicates a hazard with a high level of risk, which if not avoided, will result in death or serious injury.
 <b>WARNING</b>	Indicates a hazard with a medium or low level of risk, which if not avoided, could result in minor or moderate injury.
 <b>CAUTION</b>	Indicates a potentially hazardous situation, which if not avoided, could result in equipment damage, data loss, performance degradation, or unexpected results.
 <b>TIP</b>	Indicates a tip that may help you solve a problem or save time.
 <b>NOTE</b>	Provides additional information to emphasize or supplement important points of the main text.

## Change History

Updates between document issues are cumulative. Therefore, the latest document issue contains all updates made in previous issues.

## Issue 104(2017-12-29)

New Applications

Application Name	SubCategory Name	Description
ChromeRemoteDesktop	Remote_Access	ChromeRemoteDesktop is plug-in that accesses other computers or allow another user to access your computer securely over the Internet. Example: Chrome Remote Desktop

## Changed Applications

Application Name	SubCategory Name	Description
TOR	Encrypted_Tunnel	The Onion Router (TOR) is used to implement the second generation onion routing. Users perform anonymous communications through the TOR on the Internet. Example: TOR
saac.gov.cn	Enterprise_Application	State Archives Administration -Example: www.saac.gov.cn
MediaGet	File_Sharing	MediaGet is a protocol based on BT Download Manager, which is used to provide resource search, download and other functions.
NS_JinShanEnterprise_Common	Network_Storage	JinShan Enterprise Cloud is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. - Example: pan.ksyun.com
KsYun	Web_Browsing	KsYun is a popular data sharing platform in China. Example: www.ksyun.com
RenRen_Browsing	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its HTTP browsing traffic. -Example: www.renren.com, www.xiaonei.com
RenRen_Media	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Play Media" traffic. - Example: music.store.renren.com

Application Name	SubCategory Name	Description
RenRen_Upload	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Upload" traffic. -Example: upload.renren.com
Woool	Game	Woool, developed by ShengQu and operated by ShengDa, is a kind of multi-player online game. Example: Woool online game
NS_WeiYun_Common	Network_Storage	WeiYun is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. - Example: www.weiyun.com
NS_WeiYun_Download	Network_Storage	WeiYun is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.weiyun.com
NS_WeiYun_Upload	Network_Storage	WeiYun is a network storage that supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.weiyun.com

## Discarded Applications

Application Name	SubCategory Name	Discarded Reason
NS_JinShanDisk_Download	Network_Storage	Service is closed.
NS_JinShanDisk_Upload	Network_Storage	Service is closed.
Pandora	File_Sharing	Service is closed.

Application Name	SubCategory Name	Discarded Reason
NS_JinShanEnterprise_Upload	Network_Storage	The uploading traffic and downloading traffic cannot be segmented and recognized as NS_JinShanEnterprise_Common, so comment this protocol.
NS_JinShanEnterprise_Download	Network_Storage	The uploading traffic and downloading traffic cannot be segmented and recognized as NS_JinShanEnterprise_Common, so comment this protocol.
Qtrax	File_Sharing	Service is closed.

## Issue 103(2017-12-21)

### Changed Applications

Application Name	SubCategory Name	Description
WeiXin_Transfer	IM_File_Transfer	WeChat is an IM application for smartphones developed by Tencent with which protocol used to identify the generated file transfer traffic. Example: WeChat
QiXiu_Vchat	Instant_Messaging	QiXiu is a kind of video chat platform, supporting the free video chat room, multi-person video chat and make friends by video. Example: QiXiu

## Issue 102(2017-12-14)

### New Applications

Application Name	SubCategory Name	Description
CNKI	Enterprise_Application	CNKI is a leading digital publishing platform, which provides knowledge and information for people over the world. Example: www.cnki.net

## Changed Applications

Application Name	SubCategory Name	Description
Alipay	Finance	Alipay is a third-party online payment platform operated by Alibaba. Example: www.alipay.com
FTP	Infrastructure	FTP is the abbreviation of File Transfer Protocol which also has a specific software can be applied to various applications to control file's two-way transmission on the Internet. Example: CuteFTP
QQ_Webmail	Email	Tencent Mailbox is an electronic mailbox. Example: mail.qq.com
SharePoint	Enterprise_Application	Sharepoint is a group co-operation tool that creates team sites and portals. The protocol identifies the flow of the sharepoint cloud through microsoft office 365 accounts.Example:sharepoint.com,SharePoint
Microsoft_Office_365	Enterprise_Application	Microsoft Office 365 is a cloud-based service from Microsoft that offers productivity software such as email, web conferencing, file sharing and Office Web Apps. The protocol identifies the flow of browsing Microsoft office 365. Example: www.office.com

## Discarded Applications

Application Name	SubCategory Name	Discarded Reason
DaFuXing	Finance	Service is closed.
WaiHuiTong	Finance	Service is closed.

## Issue 101(2017-12-07)

## New Applications

Application Name	SubCategory Name	Description
Betternet	Encrypted_Tunnel	Betternet is a free over-the-wall software. software. Example: Betternet
Leanote	File_Sharing	Leanote is a suite of software designed for taking and archiving notes, which can also have file attachments and can be sorted into folders, tagged, annotated, edited, given comments and blogs.- Example:www.leanote.com

## Changed Applications

Application Name	SubCategory Name	Description
NS_Uyun	Network_Storage	Uyun is a network storage, which is a global leading provider of free cloud storage, cloud computing platform and free online storage space. - Example: www.51gugu.com
NS_Uyun_Download	Network_Storage	Uyun is a network storage that supports uploading and downloading. This application is used to identify its downloading traffic. -Example: www.51gugu.com

Application Name	SubCategory Name	Description
NS_Uyun_Upload	Network_Storage	Uyun is a network storage that supports uploading and downloading. This application is used to identify its uploading traffic.-Example: www.51gugu.com
TongDaXin	Finance	TongDaXin, released by TDX.com.cn, is a kind of real-time stock quotation software. Example: TongDaXin

## Issue 100(2017-11-30)

### New Applications

Application Name	SubCategory Name	Description
Pocket_Controller	Remote_Access	Pocket_Controller is a productivity solution enabling full remote control and viewing of mobile devices using a desktop, keyboard, and mouse. Example:Pocket_controller
NS_Uyun	Network_Storage	Uyun is a network storage, which is a global leading provider of free cloud storage, cloud computing platform and free online storage space. - Example: www.51gugu.com
NS_Uyun_Download	Network_Storage	Uyun is a network storage that supports uploading and downloading. This application is used to identify its downloading traffic. -Example: www.51gugu.com

Application Name	SubCategory Name	Description
NS_Uyun_Upload	Network_Storage	Uyun is a network storage that supports uploading and downloading. This application is used to identify its uploading traffic.-Example: www.51gugu.com
BACnet	Infrastructure	BACnet - Network data communication protocol for building automation control.

## Changed Applications

Application Name	SubCategory Name	Description
WindowsUpdate	Software_Update	WindowsUpdate is an automatic update component. Example: Windows Update
Kaspersky	Software_Update	Kaspersky is a kind of anti-virus software popular in the world. Example: Kaspersky
GooglePlay	AppDownload	Google Play, formerly known as the Android Market, is a digital distribution service operated by Google. -Example: GooglePlay
AnyDesk	Remote_Access	AnyDesk is a kind of software that provides remote desktop new perspective. Example: AnyDesk
WeLink_Live	Media_Sharing	WeLink is an enterprise mobile office software. The protocol identifies the flow of live and review live. Example: WeLink
Zoom	Internet_Conferencing	Zoom is an online video conferencing software. Example: zoom.us, Zoom

## Discarded Applications

Application Name	SubCategory Name	Discarded Reason
QQVoice	VoIP	Service is closed.

## Issue 99(2017-11-24)

### Changed Applications

Application Name	SubCategory Name	Description
MS_Office_OneNote	Enterprise_Application	Office OneNote is part of the Microsoft Office system integrated. It allows you collect, organize, find, and share your notes and information more easily and effectively.
SkyDrive	Network_Storage	OneDrive is a cloud storage service launched by the Microsoft Corp. SkyDrive was renamed as OneDrive on 2014. The protocol identifies the flow of uploading and downloading files. Example: onedrive.live.com, OneDrive
Yammer	Social_Networking	Yammer is a dedicated and safe enterprise social networking site used in work venues. Users can communicate, cooperate and share information in their own groups.
Amazon	Electronic_Business	Amazon is a popular online shopping website in China. Example: www.amazon.cn
WeLink_Live	Media_Sharing	WeLink is an enterprise mobile office software. The protocol identifies the flow of live and review live. Example: WeLink
Zoom	Internet_Conferencing	Zoom is an online video conferencing software. Example: zoom.us, Zoom

Application Name	SubCategory Name	Description
HotMail	Email	Hotmail is Mailbox is an electronic mailbox provided by Microsoft. Example: www.hotmail.com
WeiXin	Instant_Messaging	WeiXin is a kind of software providing IM services for smart mobile phones, which is developed by Tencent. Example: WeiXin
GooglePlay	AppDownload	Google Play, formerly known as the Android Market, is a digital distribution service operated by Google. -Example: GooglePlay

## Discarded Applications

Application Name	SubCategory Name	Discarded Reason
UCEIM_IM	Instant_Messaging	Service is closed.
UCEIM_Filetransfer	IM_File_Transfer	Service is closed.
Unicall_IM	Instant_Messaging	Service is closed.
Unicall_FileTransfer	IM_File_Transfer	Service is closed.
NS_TurboUpload_Upload	Network_Storage	Service is closed.
NS_TurboUpload_Download	Network_Storage	Service is closed.
Xfire	Instant_Messaging	Service is closed.

## Issue 98(2017-11-16)

## New Applications

Application Name	SubCategory Name	Description
WangYiMusic	Media_Sharing	WangYiMusic is a focus on the discovery and sharing of music products, relying on professional musicians, DJ, friends recommendation and social features. Example: WangYiMusic
Netease_Common	Web_Browsing	Public traffic from netease ,containing netease related traffic that cannot be categorized into specific applications, for example, image.
AnyDesk	Remote_Access	AnyDesk is a kind of software that provides remote desktop new perspective. Example: AnyDesk
Wiz	File_Sharing	Wiz is a kind of note-taking software, which can support multiple platforms and multiple attachments formats, and can incrementally synchronize in real-time.-Example: Wiz, www.wiz.com

#### Changed Applications

Application Name	SubCategory Name	Description
AppStore	AppDownload	AppStore is a kind of online application software released by Apple. Example: AppStore
Instagram	Web_Browsing	Instagram is a picture processing and sharing application. Example: Instagram
MobileMop	Social_Networking	Pocket Mop is a kind of mobile client of an interactive entertainment community. Example: MobileMop

Application Name	SubCategory Name	Description
eSpace_IM	Instant_Messaging	eSpace is a kind of enterprise-class IM software. eSpace_IM protocol can identify the text chat traffic of eSpace. Example: eSpace
eSpace_VoIP	VoIP	eSpace is an enterprise-class IM software. eSpace_VoIP protocol can identify the audio, signaling and video traffic of eSpace. Example: eSpace
Espace_Filetransfer	IM_File_Transfer	Espace is an IM tool that is developed by Huawei for internal use. This protocol is used to identify the generated file transfer traffic.
WeiXin_VoIP	VoIP	WeiXin is an IM service developed by Tencent for smart mobile phones. This protocol is used to identify audio traffic generated by WeiXin. Example: WeiXin
WeiXin	Instant_Messaging	WeiXin is a kind of software providing IM services for smart mobile phones, which is developed by Tencent. Example: WeiXin
FoxNews	Web_Browsing	FoxNews is a cable news channel website, owned by the Fox Entertainment Group. Example: www.foxnews.com

## Discarded Applications

Application Name	SubCategory Name	Discarded Reason
XFire_IM	Instant_Messaging	Service is closed.
Xfire_VoIP	VoIP	Service is closed.

## Issue 97(2017-11-09)

### New Applications

Application Name	SubCategory Name	Description
Alpemix	Remote_Access	Alpemix is the fastest and easiest way for remote support and presentation. Example: Alpemix

### Changed Applications

Application Name	SubCategory Name	Description
QQ_Webmail	Email	Tencent Mailbox is an electronic mailbox. Example: mail.qq.com
Youtube	Web_Video	YouTube is an online video website which supports the uploading, watching and make comment below videos.It is the representative in many similar video websites. Example: www.youtube.com
Yting	Web_Browsing	Yting means the SSL or HTTP traffic containing signature .yting.com.
Facebook_Videos	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Videos can identify the flow of viewing videos on the website. - Example: www.facebook.com
Facebook_Photos	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Photos can identify the flow of browsing photos on the website. -Example: www.facebook.com

## Null Applications

Application Name	SubCategory Name	Null Reason

KuBao_PCtoPC	VoIP	KuBao webphone can not be used.
KuBao_PCtoPhone	VoIP	KuBao webphone can not be used.
Qcn_IM	Instant_Messaging	QCN can not be used.
Qcn_FileTransfer	IM_File_Transfer	QCN can not be used.
TangRenJie_IM	Instant_Messaging	TangRenJie application can not be used.
TangRenJie_VoIP	VoIP	TangRenJie application can not be used.

## Issue 96(2017-11-03)

## New Applications

Application Name	SubCategory Name	Description
Bilibili	Media_Sharing	Bilibili as the largest youth pop culture entertainment community, also known as "B station" is a highly interactive and secondary share created pop culture entertainment community. Example: Bilibili
DaHua_IPCamera	Media_Sharing	DaHua Webcam. -Example: DH IPC
Hikvision_IPCamera	Media_Sharing	HikvisionWebcam. - Example: Hikvision IPC
Uniview_IPCamera	Media_Sharing	Uniview Webcam. - Example: Uniview IPC
CHARGEN	Infrastructure	The Character Generator Protocol(CHARGEN) is a protocol for testing and debugging. Example: CHARGEN

## Changed Applications

Application Name	SubCategory Name	Description
NS_WoCloud_Common	Network_Storage	WoCloud is a network storage that supports the uploading and downloading. This application is used to identify its persistent-connection traffic;including upload, download, browse, login and other non-distinguishable traffic. - Example: www.wocloud.com.cn
NS_WoCloud_Download	Network_Storage	WoCloud is a network storage that supports the uploading and downloading. The protocol identifies the download traffic for the win7 client. -Example: www.wocloud.com.cn
NS_WoCloud_Upload	Network_Storage	WoCloud is a network storage that supports the uploading and downloading. The protocol identifies the upload traffic for the win7 client. -Example: www.wocloud.com.cn
IPC_Signal	Media_Sharing	IPC is the video monitoring service used for the IP cameras manufactured by Huawei Technology. - Example: IPC
RTSP	Infrastructure	Real Time Streaming Protocol (RTSP) is a protocol in the application layer in the TCP/IP protocol system and is a kind of IETF RFC standard submitted by Columbia University, Netscape and RealNetworks. Example: Realplayer
eSpace_VOIP	VoIP	eSpace is an enterprise-class IM software. eSpace_VoIP protocol can identify the audio, signaling and video traffic of eSpace. Example: eSpace

Application Name	SubCategory Name	Description
WeiXin	Instant_Messaging	WeiXin is a kind of software providing IM services for smart mobile phones, which is developed by Tencent. Example: WeiXin

## Issue 95(2017-10-26)

### New Applications

Application Name	SubCategory Name	Description
SnakeOff	Game	SnakeOff is a leisure game. Example: SnakeOff
InKe	Media_Sharing	InKe is the first real-time video and live social media software in China.Example: InKe
Airdroid	Remote_Access	Airdroid a supported computer and mobile interconnection, You can use computer client and Web page management of the mobile phone software. Example:Airdroid
SheDiaoYingXiongZhuan	Game	SheDiaoYingXiongZhuan is a martial arts action mobile game. Example: SheDiaoYingXiongZhuan
LaoHuGame	Game	LaoHuGame is a mobile game platform.Example: www.laohu.com

### Changed Applications

Application Name	SubCategory Name	Description
WangZheRongYao	Game	WangZheRongYao is a kind of MOBA mobile game developed by Tencent, which can operate on Android and IOS platforms. Example: WangZheRongYao

Application Name	SubCategory Name	Description
LiZhiFM	Media_Sharing	LiZhiFM is a music radio station software.Example: LiZhiFM
HuYa	Media_Sharing	HuYa is China's leading interactive platform.Example: HuYa
TaoBao	Electronic_Business	TaoBao is a mobile client of a popular online shopping website in China. Example: TaoBao

## Null Applications

Application Name	SubCategory Name	Null Reason
Y_Live	VoIP	Y-Live is a non-popular application; null the rule, and do not verify and identify.

## Discarded Applications

Application Name	SubCategory Name	Discarded Reason
IKu	PeerCasting	IKu is removed.
Sohu_WeiBo	Social_Networking	Sohu_WeiBo is closed.

## Issue 94(2017-10-12)

## New Applications

Application Name	SubCategory Name	Description
NS_Nutstore	Network_Storage	NS_Nutstore is a kind of convenient, safe and professional netdisk. Example: www.jianguoyun.com, Nutstore

Application Name	SubCategory Name	Description
QCloud	Web_Browsing	QCloud is a public cloud platform developed by Tencent, which is built for enterprises and individuals.
LiZhiFM	Media_Sharing	LiZhiFM is a music radio station software.Example: LiZhiFM
Alisoft	Electronic_Business	Alisoft is Alibaba's online service company, is committed to China's small and medium enterprises to provide reliable online software services. Example:Alisoft.

## Changed Applications

Application Name	SubCategory Name	Description
QQLive	PeerCasting	QQLive is a kind of software for watching online videos developed by Tencent. Example: QQLive Web TV, Wanneng Web TV and TTver Web TV

## Issue 93(2017-09-27)

## New Applications

Application Name	SubCategory Name	Description
Fastviewer	Internet_Conferencing	Fastviewer is a popular global video conferencing application, the user can invite others to chat with others, desktop sharing, etc. Example: Fastviewer

Application Name	SubCategory Name	Description
Meitu	Web_Browsing	Meitu is a protocol that identifies the meitu related flow. Meitu Inc produced some beauty software, such as MeituXiuXiu, MeiYan Camera.

## Changed Applications

Application Name	SubCategory Name	Description
ABC	Finance	ABC is the online banking system of the Agricultural Bank of China. Example: www.abchina.com and www.95599.cn
DouYuTV	Media_Sharing	DouYuTV is a kind of software for watching online videos. Example: DouYu
Youtube	Web_Video	YouTube is an online video website which supports the uploading, watching and make comment below videos.It is the representative in many similar video websites. Example: www.youtube.com
QiYi	PeerCasting	QiYi is an online video player provided by Baidu. Example: QiYi, www.iqiyi.com
WangZheRongYao	Game	WangZheRongYao developed by Tencent and operation of a game operators in Android, IOS platform MOBA class mobile games.

## Issue 92(2017-09-21)

## New Applications

Application Name	SubCategory Name	Description
HuYa	Media_Sharing	HuYa is China's leading interactive platform. Example: HuYa
Zoom	Internet_Conferencing	Zoom is an online video conferencing software. Example: zoom.us, Zoom
WeLink	Enterprise_Application	WeLink is an enterprise mobile office software. Example: WeLink
WeLink_VideoCall	VoIP	WeLink is an enterprise mobile office software. The protocol identifies the flow of video calling. Example: WeLink
WeLink_Live	Media_Sharing	WeLink is an enterprise mobile office software. The protocol identifies the flow of live and review live. Example: WeLink

#### Changed Applications

Application Name	SubCategory Name	Description
115net_disk	Network_Storage	115Disk is a network storage.It supports the uploading and downloading. This protocol is used to identify its logon traffic.
NS_115Disk_Upload	Network_Storage	115Disk is a network storage,It supports the uploading and downloading.This application is used to identify its uploading traffic. -Example: 115.com
NS_115Disk_Download	Network_Storage	115Disk is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: 115.com

Application Name	SubCategory Name	Description
vip.com	Electronic_Business	Vip.com is a special sales website, which covers thousands of brands of clothes, bags, cosmetics, household products, luxury products and so on.

## Null Applications

Application Name	SubCategory Name	Null Reason
OperaMail	Email	Operamail application is closed.

## Issue 91(2017-09-15)

## New Applications

Application Name	SubCategory Name	Description
YinYangShi	Game	yinyangshi is a kind of 3D Japanese round style RPG mobile game developed by Netease mobile game company in China. Example: yinyangshi.

## Changed Applications

Application Name	SubCategory Name	Description
KaiXinXiaoXiaoLe	Game	KaiXinXiaoXiaoLe developed a three consumer class casual games,it can identify the network traffic.
139	Email	139 Mailbox is a new generation telecom class service quality mailbox provided by China Mobile, which realizes the effective interaction between mobile phone and the mail box.

Application Name	SubCategory Name	Description
Sina_Webmail	Email	Sina Mailbox is an electronic mailbox. Example: mail.sina.com/ mail.2008.sina.com
360Cloud	Network_Storage	360Cloud PC client is a web disk management tool developed by Qihoo. 360Cloud lets you easily access your photos, documents, music, videos, software and applications at any time in any place without a USB flash disk and never lose them.
360CloudWeb	Network_Storage	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its Browsing traffic. -Example: yunpan.360.cn
NS_360Cloud_Upload	Network_Storage	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: yunpan.360.cn
NS_360Cloud_Download	Network_Storage	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:yunpan.360.cn
Ku6	Web_Video	Ku6 is a very popular online video website in China, which includes plentiful video information. Example: www.ku6.com
MeiTuan	Electronic_Business	Meituan is a popular group purchasing website in China. Example: www.meituan.com
Blue_Crab	Utility	Blue_crab is an offline browser.

## Issue 90(2017-09-07)

### New Applications

Application Name	SubCategory Name	Description
PianoTiles2	Game	PianoTiles2 is a combine music and arcade style of mobile phone games.
SkypeForBusiness_Mbroadcast	Instant_Messaging	Skype For Bussiness is the enterprise version of skype. The protocol identifies the flow of creating and watching live meeting, also identifies the part flow of broadcasting live meeting . Example: Skype For Bussiness
XiaoMi_Service	Web_Browsing	XiaoMi_Service is XiaoMi Company's software public traffic.

### Changed Applications

Application Name	SubCategory Name	Description
GMail	Email	Gmail is a kind of electronic mailbox provided by Google. Gmail for Android does not support flow blocking. Example: www.gmail.com
WangZheRongYao	Game	WangZheRongYao developed by Tencent and operation of a game operators in Android, IOS platform MOBA class mobile games.
SkypeForBusiness	Instant_Messaging	Skype For Bussiness is the enterprise version of skype,this protocol identifies the flow of im and voip. Example: Skype For Bussiness
Lync	Enterprise_Application	Lync is a VoIP-IM software served for enterprise.

Application Name	SubCategory Name	Description
Skype_VoIP	VoIP	Skype is a popular P2P network phone as well as a kind of IM software worldwide. Example: Skype. Note: To effectively block Skype VoIP, Skype_IM should be blocked, too.
Skype_IM	Instant_Messaging	Skype is a popular P2P network telephone and a kind of IM software worldwide. This application identifies login traffic of Skype. Example: Skype. Note: If we want to block SkypeIM effectively, Skype_VoIP should also be blocked.
Microsoft_Office_365_File Access	Enterprise_Application	Microsoft_Office_365_File Access identifies the flow of accessing Microsoft office 365 word files. Example: www.office.com
Microsoft_Office_365_File Update	Enterprise_Application	Microsoft_Office_365_File Update identifies the flow of Microsoft office 365 word files updating. Example: www.office.com
google	Search_Engines	Google.com is on the official website of Google search. This protocol contains Google common traffic.
GoogleTalk_IM	Instant_Messaging	GoogleTalk, developed by Google, is a kind of instant chat software and supports the functions such as text chat and voice chat. Example: GoogleTalk. Login and text chat do not support flow blocking. Example: GoogleTalk

Application Name	SubCategory Name	Description
SkyDrive	Network_Storage	OneDrive is a cloud storage service launched by the Microsoft Corp. SkyDrive was renamed as OneDrive on 2014. The protocol identifies the flow of uploading and downloading files. Example: onedrive.live.com,OneDrive
MiLiao	Instant_Messaging	MiLiao is a free IM tool integrated with multiple mobile phone platforms which supported by various mobile phones and it supports text chatting and image transferring. Example: MiLiao

## Issue 23 (2015-09-23)

### Add Applications

Application Name	SubCategory Name	Description
RenRen_HTTPS	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its HTTPS browsing traffic. -Example: www.renren.com
RenRen_Image	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Browsing Images" traffic. - Example: www.rrimg.com

Application Name	SubCategory Name	Description
RenRen_Browsing	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its HTTP browsing traffic. -Example: www.renren.com, www.xiaonei.com
RenRen_Mobile	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its HTTP browsing RenRen mobile website traffic. -Example: m.renren.com
RenRen_Account	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Account" traffic. -Example: safe.renren.com
RenRen_API	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "API" traffic. -Example: api.m.renren.com
RenRen_MicroAPP_RenPin	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "My RenRen Power" traffic. -Example: renpin.renren.com
RenRen_MicroAPP_Gudie	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "RenRen Home Page" traffic. -Example: guide.renren.com
RenRen_MicroAPP_VIP	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "VIP" traffic. -Example: i.renren.com

Application Name	SubCategory Name	Description
RenRen_Redirect	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Redirect URL" traffic. - Example: transfer.renren.com
RenRen_MicroAPP_APP	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "APP" traffic. - Example: app.renren.com
RenRen_MicroAPP_PhotoAlbum	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Photo Album" traffic. -Example: photo.renren.com
RenRen_Statistics	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Statistics" traffic. - Example: dj.renren.com
RenRen_MicroAPP_Game	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Game" traffic. - Example: wan.renren.com
RenRen_Adsense	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Adsense" traffic. -Example: bolt.jebe.renren.com
RenRen_Upload	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Upload" traffic. -Example: upload.renren.com

Application Name	SubCategory Name	Description
RenRen_MicroAPP_Like	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Like" traffic. - Example: like.renren.com
RenRen_MicroAPP_Share	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Share" traffic. - Example: share.renren.com
RenRen_Message	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Mail and Message" traffic. -Example: notify.renren.com
RenRen_MicroAPP_Site	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Site" traffic. - Example: zhan.renren.com
RenRen_Publish	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Publish" traffic. -Example: shell.renren.com
RenRen_Media	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Play Media" traffic. - Example: music.store.renren.com
RenRen_MicroAPP_Blog	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Blog" traffic. - Example: blog.renren.com

Application Name	SubCategory Name	Description
RenRen_MicroAPP_Group	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Group" traffic. - Example: xiaozu.renren.com
RenRen_Login	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "login and Register" traffic. -Example: login.renren.com
RenRen_MicroAPP_Gift	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Gift Center" traffic. -Example: gift.renren.com
RenRen_MicroAPP_Friend	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Friend" traffic. -Example: friend.renren.com
RenRen_MicroAPP_Topic	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Topic" traffic. - Example: huati.renren.com
RenRen_MicroAPP_Status	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Status" traffic. - Example: status.renren.com
RenRen_MicroAPP_Gossip	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Gossip" traffic. -Example: gossip.renren.com

Application Name	SubCategory Name	Description
RenRen_MicroAPP_Job	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Job" traffic. - Example: zhichang.renren.com
RenRen_MicroAPP_Public Page	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "RenRen Public Page" traffic. -Example: page.renren.com
RenRen_MicroAPP_School	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "School" traffic. -Example: xiaoyuan.renren.com
RenRen_MicroAPP_Association	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Association" traffic. -Example: st.renren.com
RenRen_MicroAPP_Matter	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Matter" traffic. -Example: matter.renren.com
RenRen_MicroAPP_Search	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Search" traffic. -Example: browse.renren.com

Application Name	SubCategory Name	Description
RenRen_MicroAPP_OpenPlatform	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "RenRen Open Platform" traffic. -Example: dev.renren.com
RenRen_MicroAPP_Widget	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Widget" traffic. -Example: widget.renren.com
RenRen_MicroAPP_BiBi	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "BiBi" traffic. -Example: bibi.renren.com
RenRen_MicroAPP_Wall	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "RenRen Wall" traffic. -Example: w.renren.com
RenRen_MicroAPP_Impression	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Impression" traffic. -Example: wiki.renren.com
RenRen_Comment	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Comment" traffic. -Example: comment.renren.com

Application Name	SubCategory Name	Description
RenRen_MicroAPP_Name	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Name" traffic. - Example: name.renren.com
RenRen_MicroAPP_Shopping	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Shopping" traffic. -Example: j.renren.com
RenRen_MicroAPP_ShortURL	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "ShorURL" traffic. -Example: rrurl.cn
RenRen_Locate	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Locate" traffic. -Example: api.m.renren.com
RenRen_MicroAPP_Lover	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Lover" traffic. - Example: lover.renren.com
RenRen_MicroAPP_FenQi	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "FenQi" traffic. - Example: fenqi.renren.com
RenRen_Download	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Download" traffic. - Example: download.renren.com

Application Name	SubCategory Name	Description
RenRen_VoIP	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "VoIP" traffic. -Example: api.m.renren.com
RenRen_MicroAPP_Public Platform	Social_Networking	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "RenRen Public Platform" traffic. -Example: public.renren.com
Google_Drive	Network_Storage	Google_Drive is a kind of online cloud storage service distributed by Google . - Example:drive.google.com
QQ_Browsing	Web_Browsing	QQ, an instant online chat tool developed by Tencent, is one of the IM tools who owns the largest number of registered members in China. Example: QQ, including the mobile QQ.
QUIC	Search_Engines	QUIC is Quick UDP Internet Connection which is designed by Google.

DouBan_MicroAPP_Book	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Book" traffic. -Example: book.douban.com
DouBan_MicroAPP_Brand	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Brand" traffic. -Example: brand.douban.com
DouBan_MicroAPP_Dongxi	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Things" traffic. -Example: dongxi.douban.com
DouBan_MicroAPP_DouBanAPP	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "APP" traffic. -Example: frodo.douban.com

Application Name	SubCategory Name	Description
DouBan_MicroAPP_Event	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Event" traffic. - Example: www.douban.com
DouBan_MicroAPP_FM	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "FM" traffic. - Example: douban.fm
DouBan_MicroAPP_Group	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Group" traffic. - Example: www.douban.com
DouBan_MicroAPP_Location	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Location" traffic. -Example: www.douban.com
DouBan_MicroAPP_Mobile DB	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Mobile DouBan" traffic. -Example: m.douban.com
DouBan_MicroAPP_Moment	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Moment" traffic. -Example: moment.douban.com
DouBan_MicroAPP_Movie	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Movie" traffic. -Example: movie.douban.com

Application Name	SubCategory Name	Description
DouBan_MicroAPP_Music	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Music" traffic. - Example: music.douban.com
DouBan_MicroAPP_Note	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Note" traffic. - Example: www.douban.com
DouBan_MicroAPP_Read	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Read" traffic. - Example: read.douban.com
DouBan_MicroAPP_Shuo	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Say and Broadcast" traffic. - Example: www.douban.com
DouBan_MicroAPP_Site	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Site" traffic. - Example: site.douban.com
DouBan_MicroAPP_Thing	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Thing" traffic. - Example: thing.douban.com
DouBan_Publish	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Publish" traffic. -Example: book.douban.com, douban.fm

Application Name	SubCategory Name	Description
DouBan_Push	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Push Messages" traffic. - Example: push.douban.com
DouBan_Statistics	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Statistics" traffic. - Example: fundin.douban.com
DouBan_Upload	Social_Networking	DouBan is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Upload" traffic. -Example: book.douban.com,read.douban.com
NS_CM_CaiYun_Download	Network_Storage	CM_CaiYun is a network storage, It supports the uploading and downloading. -Example: mCloud,caiyun.feixin.10086.cn
NS_CM_CaiYun_Upload	Network_Storage	CM_CaiYun is a network storage, It supports the uploading and downloading. -Example: mCloud,caiyun.feixin.10086.cn
HeBeiJinShuiFuWuWang	Enterprise_Application	HeBeiJinShuiFuWuWang is the VAT anti-forgery tax control system professional services platform introduced by HeBei Aerospace Information for the taxpayers in Hebei. - Example: www.96087666.com

Application Name	SubCategory Name	Description
SunraySoft	Enterprise_Application	SunraySoft is a system of information service industry information supervision and management platform. - Example: www.sunraysoft.com.cn
chinaport.gov.cn	Enterprise_Application	chinaport.gov.cn is the cross-departmental, cross-regional, cross-industry unified information platform approved by the State Council and built by the General Administration of Customs and the other 14 ministries. -Example: www.chinaport.gov.cn
gd-n-tax.gov.cn	Enterprise_Application	gd-n-tax.gov.cn is a web site of national tax for Guangdong Province. - Example: www.gd-n-tax.gov.cn
gdltax.gov.cn	Enterprise_Application	gdltax.gov.cn is a web site of the land tax for Guangdong Province. - Example: www.gdltax.gov.cn
95001111.com	Enterprise_Application	Product Identification Authentication and Tracking System is in order to promote the development of PIATS project and the construction of Internet media operations . - Example: www.95001111.com
NS_1WangPan_Common	Network_Storage	1WangPan is a network storage, It supports the uploading and downloading.This application is used to identify its persistent-connection traffic. - Example: www.1wp.me

Application Name	SubCategory Name	Description
NS_1WangPan_Download	Network_Storage	1WangPan is a network storage, It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.1wp.me
NS_1WangPan_Upload	Network_Storage	1WangPan is a network storage, It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.1wp.me
chinatax.gov.cn	Enterprise_Application	chinatax.gov.cn is the website of State Administration of Taxation. -Example: www.chinatax.gov.cn
chinaippc.org.cn	Enterprise_Application	Chinese intellectual property promotion center is domestic professional intellectual property information website . - Example: www.chinaippc.org.cn
cnipr.com	Enterprise_Application	cnipr.com is a website for retrieving Patent and releasing information related to intellectual property. - Example: www.cnipr.com
KaiXin_Browsing	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its HTTP browsing traffic. -Example: www.kaixin001.com.cn
KaiXin_Image	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Browsing Images" traffic. - Example: img1.kaixin001.com.cn

Application Name	SubCategory Name	Description
KaiXin_Media	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Play Media" traffic. - Example: www.kaixin001.com.cn
KaiXin_Upload	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Upload" traffic. -Example: www.kaixin001.com.cn
KaiXin_API	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "API" traffic. - Example:api.kaixin001.com
TaxRefund	Enterprise_Application	TaxRefund is the professional advice and service website about the export tax rebate business. - Example: www.taxrefund.com.cn
KaiXin_MicroAPP_Movie	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Movie" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Friend	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Friend" traffic. -Example: www.kaixin001.com
KaiXin_Chat	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Chat" traffic. -Example: www.kaixin001.com.cn

Application Name	SubCategory Name	Description
KaiXin_MicroAPP_APP	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "APP" traffic. - Example: www.kaixin001.com
sarft.gov.cn	Enterprise_Application	State General Administration of Press - Example: www.sarft.gov.cn
KaiXin_Message	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Mail and Message" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Record	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Record" traffic. -Example: www.kaixin001.com
KaiXin_Publish	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Publish" traffic. -Example: www.kaixin001.com
KaiXin_Comment	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Comment" traffic. - Example: www.kaixin001.com
KaiXin_Account	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Account" traffic. -Example: reg.kaixin001.com

Application Name	SubCategory Name	Description
csrc.gov.cn	Enterprise_Application	The China securities regulatory commission is responsible for supervision and administration of the national securities and futures market . -Example: www.csrc.gov.cn
aqsiq.gov.cn	Enterprise_Application	General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China -Example: www.aqsiq.gov.cn
chinanet.gov.cn	Enterprise_Application	www.chinanet.gov.cn - Example: www.chinanet.gov.cn
KaiXin_MicroAPP_Coterie	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Coterie" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_PersonalSpace	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Personal Space" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Gift	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Gift" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_PhotoAlbum	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Photo Album" traffic. -Example: www.kaixin001.com

Application Name	SubCategory Name	Description
KaiXin_MicroAPP_News	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "News" traffic. - Example: www.kaixin001.com
nhfpc.gov.cn	Enterprise_Application	nhfpc.gov.cn response the whole planning health and family planning service resource allocation, formulate national system for basic drugs, family planning policy, supervision and management of public health and medical services, family planning management and service work, etc. -Example: www.nhfpc.gov.cn

NS_KuNiuWangPan_Comm on	Network_Storage	KuNiuWangPan is a network storage,It supports the uploading and downloading. -Example: www.300.la
NS_KuNiuWangPan_Download	Network_Storage	KuNiuWangPan is a network storage,It supports the uploading and downloading. -Example: www.300.la
NS_KuNiuWangPan_Upload	Network_Storage	KuNiuWangPan is a network storage,It supports the uploading and downloading. -Example: www.300.la

Application Name	SubCategory Name	Description
KaiXin_MicroAPP_Pay	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "KaiXin Money charging center" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_Group	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Group" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_NetworkStorage	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Network Storage" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Shake	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Shake him" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Karma	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Karma" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Read	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Read" traffic. - Example: www.kaixin001.com

Application Name	SubCategory Name	Description
NS_163Disk_Upload	Network_Storage	163Disk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.163disk.com
NS_HongDisk_Common	Network_Storage	HongDisk is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: HongDisk, 7cbox.cn
NS_HongDisk_Download	Network_Storage	HongDisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: HongDisk, 7cbox.cn
NS_HongDisk_Upload	Network_Storage	HongDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: HongDisk, 7cbox.cn
NS_icoffer_Common	Network_Storage	Icoffer is a network storage,It supports the uploading and downloading. -Example: icoffer, icoffer.cn
NS_icoffer_Download	Network_Storage	Icoffer is a network storage,It supports the uploading and downloading. -Example: icoffer, icoffer.cn
NS_icoffer_Upload	Network_Storage	Icoffer is a network storage,It supports the uploading and downloading. -Example: icoffer, icoffer.cn

Application Name	SubCategory Name	Description
NS_CTDisk_Download	Network_Storage	CTDisk is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic. - Example: www.400gb.com
NS_CTDisk_Upload	Network_Storage	CTDisk is a network storage,It supports the uploading and downloading.This application is used to identify its uploading traffic. - Example: www.400gb.com
NS_SkyworthCloud_Download	Network_Storage	SkyworthCloud is a network storage client,It supports the uploading and downloading.This application is used to identify its downloading traffic. -Example: SkyworthCloud IOS version.
NS_SkyworthCloud_Upload	Network_Storage	SkyworthCloud is the network disk client,It supports the uploading and downloading.This application is used to identify its uploading traffic. -Example: SkyworthCloud IOS version.
NS_KingDee_Download	Network_Storage	KingDee is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: cloud.kingdee.com
NS_KingDee_Upload	Network_Storage	KingDee is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: cloud.kingdee.com

Application Name	SubCategory Name	Description
NS_XinHuaDisk_Common	Network_Storage	XinHuaDisk is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Client Example:XinHuaDisk PC version. Web Example: vdisk.home.news.cn
NS_XinHuaDisk_Download	Network_Storage	XinHuaDisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Client Example:XinHuaDisk PC version. -Example: vdisk.home.news.cn
NS_XinHuaDisk_Upload	Network_Storage	XinHuaDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Client Example:XinHuaDisk PC version. Web Example: vdisk.home.news.cn
NS_Ys168_Common	Network_Storage	Ys168Disk is a network storage,It supports the uploading and downloading.This application is used to identify its persistent-connection traffic. - Example: www.ys168.com
NS_HowFile_Common	Network_Storage	HowFile is a network storage supports the uploading and uploading. This application is used to identify its downloading traffic. -Example: www.howfile.com

Application Name	SubCategory Name	Description
stats.gov.cn	Enterprise_Application	stats.gov.cn is the official website which is the agency directly under the State Council to manage national statistics and accounting work of the national economy. -Example: www.stats.gov.cn
moe.gov.cn	Enterprise_Application	moe.gov.cn is the official website which is the component department of the State Council to manage education and language work. -Example: www.moe.gov.cn
KaiXin_HeartBeat	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "HeartBeat" traffic. - Example:www.kaixin001.com
KaiXin_Mobile	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its HTTP browsing KaiXin mobile website traffic. -Example: wap.kaixin001.com
KaiXin_Login	Social_Networking	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "login" traffic. -Example: www.kaixin001.com
NS_163Disk_Download	Network_Storage	163Disk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.163disk.com

Application Name	SubCategory Name	Description
NS_KingDee_Common	Network_Storage	KingDee is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. - Example: cloud.kingdee.com
NS_JinShanEnterprise_Common	Network_Storage	JinShan Enterprise Cloud is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. - Example: e.kuaipan.com
NS_WoCloud_Common	Network_Storage	WoCloud is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic.-Example: www.wocloud.com.cn
Google_API	Search_Engines	Google_API identifies the API interface traffic of Google products. -Example: Hangouts

Application Name	SubCategory Name	Description
Facebook_Login	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Login can identify the login flow of the website. -Example: www.facebook.com
Facebook_WebBrowsing	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_WebBrowsing can identify the flow of browsing web pages on the website. -Example: www.facebook.com
Facebook_Photos	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Photos can identify the flow of browsing photos on the website. -Example: www.facebook.com
Facebook_Videos	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Videos can identify the flow of viewing videos on the website. - Example: www.facebook.com
Facebook_FileTransfer	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_FileTransfer can identify the flow of transferring files on the website. -Example: www.facebook.com

Application Name	SubCategory Name	Description
Facebook_Applications	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Applications can identify the flow of using applications on the website. -Example: www.facebook.com
Facebook_Games	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Games can identify the flow of playing games on the website. - Example: www.facebook.com
Facebook_Messages	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Messages can identify the flow of chatting messages on the website. -Example: www.facebook.com
Facebook_VideoChat	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_VideoChat can identify the flow of video chatting signal on the website. -Example: www.facebook.com
Facebook_Posting	Social_Networking	Facebook is a social utility that connects people with friends and others who work, study and live around them. Facebook_Posting can identify the flow of posting on the website. -Example: www.facebook.com

Application Name	SubCategory Name	Description
KoreanIntellectualPropertyOffice	Enterprise_Application	Korean Intellectual Property Office -Example: www.kipo.go.kr
NS_BaiDuYunPan_Common	Network_Storage	BaiDuYunPan is a network storage,It supports the uploading and downloading. -Example: yun.baidu.com
NS_BaiDuYunPan_Download	Network_Storage	BaiDuYunPan is a network storage,It supports the uploading and downloading. -Example: yun.baidu.com
NS_BaiDuYunPan_Upload	Network_Storage	BaiDuYunPan is a network storage,It supports the uploading and downloading. -Example: yun.baidu.com
NS_GameFront_Download	Network_Storage	GameFront is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic.- Example: www.gamefront.com
NS_GameFront_Upload	Network_Storage	GameFront is a network storage,It supports the uploading and downloading.This application is used to identify its uploading traffic. - Example: www.gamefront.com
NS_360Cloud_Download	Network_Storage	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:yunpan.360.cn
NS_360Cloud_Upload	Network_Storage	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: yunpan.360.cn

Application Name	SubCategory Name	Description
NS_115Disk_Download	Network_Storage	115Disk is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: 115.com
NS_115Disk_Upload	Network_Storage	115Disk is a network storage,It supports the uploading and downloading.This application is used to identify its uploading traffic. -Example: 115.com
NS_Namipan_Common	Network_Storage	NaMiPan is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. - Example: www.namipan.cn
Microsoft_Dynamics_CRM	Network_Storage	Microsoft CRM is a customer relationship management application developed by Microsoft Corporation,Microsoft CRM is a CRM solution. - Example: portal.office.com
NS_Good.gd_Download	Network_Storage	Good.gd is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.Good.gd.cn
NS_Good.gd_Upload	Network_Storage	Good.gd is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.GoodDisk.cn

Application Name	SubCategory Name	Description
NS_Qiannaodisk_Download	Network_Storage	QianNaoDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. - Example:www.qiannao.com
NS_QianNaoDisk_Upload	Network_Storage	QianNaoDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. - Example:www.qiannao.com
Sugar_CRM	Enterprise_Application	Sugar-crm application, delivers a feature-rich set of business processes that enhance marketing effectiveness, drive sales performance, improve customer satisfaction and provide executive insight into business performance. - Example: trial.sugarcrm.eu
Buzzsaw	Enterprise_Application	Buzzsaw is a Project Management service developed by Autodesk Corporation. -Example: projectpoint.buzzsaw.com

# 1 Overview

Huawei uses service awareness (SA) to extract protocol identification rules and summarizes them to form the service awareness signature database of the SA-SDB. The SA-SDB works with the SA engine to implement protocol identification for the network traffic. The device deployed in in-line mode analyzes the traffic types based on the protocol identification result, forms traffic reports, or uses policies, such as permit, rate limiting, and deny, to control the traffic.

The SA-SDB falls into the category level, subcategory level, and application level.

- Category

Includes Business\_Systems, Entertainment, General\_Internet, Network, and General.

- SubCategory

A category contains one or more subcategories, such as Email、Game and VoIP etc.

There are 44 subcategories in total, and the corresponding relationship between category and subcategories is as follow.

Category	SubCategory	Description
Business_Systems	DataBase	Database is a class of application software that designed to manage the data , with storage, access, security, backup and other functions.
	Email	E-mail is carried out by writing, sending and receiving letters through the Internet to complete information interaction between the sender and the recipient.
	File_Access	File access.
	WebMail	Mail on website.
	Internet_Conferencing	Web conferencing refers to one shares and demonstrates documents and have meetings with other people on the Internet.
	Enterprise_Application	Enterprise application software is provided to meet the needs of enterprise application.

Category	SubCategory	Description
	Finance	Network financial refers to the online banking and stock.
	Data_Backup	Data Backup is an important tool that users can recovery data and it ensure the security and integrity of Enterprise Data.
	Electronic_Business	E-commerce is a kind of commercial activity that regards business activities as the main body, and based on the Internet within the scope permitted by law.
	Auth_Service	Network authentication service can provide safe and reliable identity authentication online.
Entertainment	Instant_Messaging	Instant Messaging allows two or more people on the network to transfer text messages, files, voice and video communication immediately.
	Media_Sharing	Media sharing refers to sharing audio, video with others on the network.

KaiXin_MicroAPP_Gift	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Gift" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_PhotoAlbum	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Photo Album" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_News	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "News" traffic. - Example: www.kaixin001.com

Application Name	Description
KaiXin_Locate	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Locate" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_Event	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Event" traffic. - Example: www.kaixin001.com
KaiXin_Adsense	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "Adsense" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_BBS	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "BBS" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_Repaste	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Repaste" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Diary	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Diary" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_PublicPage	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Public Page" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Buy	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Shopping" traffic. -Example: buy.kaixin001.com
KaiXin_MicroAPP_Game	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Game" traffic. - Example: www.kaixin001.com
KaiXin_MicroAPP_OpenPlatform	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "KaiXin Open Platform" traffic. -Example: open.kaixin001.com
KaiXin_HTTPS	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its HTTPS browsing traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Pay	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "KaiXin Money charging center" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Group	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Group" traffic. - Example: www.kaixin001.com

Application Name	Description
KaiXin_MicroAPP_NetworkStorage	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Network Storage" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Shake	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Shake him" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Karma	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Karma" traffic. -Example: www.kaixin001.com
KaiXin_MicroAPP_Read	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-application "Read" traffic. -Example: www.kaixin001.com
KaiXin_HeartBeat	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "HeartBeat" traffic. -Example: www.kaixin001.com
KaiXin_Mobile	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its HTTP browsing KaiXin mobile website traffic. -Example: wap.kaixin001.com
KaiXin_Login	KaiXin is a favourite Social Networking website in China. This protocol is used to identify its micro-action "login" traffic. -Example: www.kaixin001.com
SnapChat	SnapChat is a photo sharing application
RenRen_VoIP	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-action "VoIP" traffic. -Example: api.m.renren.com
RenRen_MicroAPP_PublicPlatform	RenRen is a favourite Social Networking website in China. This protocol is used to identify its micro-application "RenRen Public Platform" traffic. -Example: public.renren.com
Rhapsody	Rhapsody is an online music store subscription service.
ChaoJiKeChengBiao	ChaoJiKeChengBiao is a practical tool based on the curriculum. Example: ChaoJiKeChengBiao.
BaiCiZhan	BaiCiZhan is a software for learning English developed by ChenDu ChaoUI Science and Technology Co.,Ltd. The protocol identifies the flow of all functional scenes of mobile phone clients. Example: www.baicizhan.com, BaiCiZhan
CoDoon	CoDoon is the country's first GPS sports social mobile phone software. The protocol identifies the flow of all functional scenes except for sending textual message. Example: www.codoon.com, CoDoon

Application Name	Description
HuaWeiAccount	HuaWeiAccount is used for accessing Huawei services. The protocol identifies the flow of login and register. Example: hwid1.vmall.com, HuaWeiApplicationsMarket
Foursquare	Foursquare is a location-based social networking website. The protocol identifies the flow of browsing Foursquare. Example: foursquare.com, Foursquare, Swarm

## 2.2.7 VoIP

VoIP is an IP-based telephone, and can send text, voice, video and other data on the network cheaply.

Application Name	Description
Fring_VoIP	Fring is a kind of free VoIP software and is used for a mobile phone to connect to the Internet for communication and IM. Fring for Android does not supporting flow blocking in text chat. Example: Fring
QQ_VoIP	QQ, an instant online chat tool developed by Tencent, is one of the IM tools who owns the largest number of registered members in China. Example: QQ, including the mobile QQ.
Kondge_NetPhone	Kondge_NetPhone is a kind of prepaid Web phone developed by Kondge. Example: Kondge NetPhone.
GBPhone	GBPhone, released by e-Dong City, is a kind of Web phone software. Example: GBPhone Web phone.
MSN_VoIP	MSN is an IM tool provided by Microsoft, supporting text chat and file transmission. Example: MSN.
Skype_VoIP	Skype is a popular P2P network phone as well as a kind of IM software worldwide. Example: Skype. Note: To effectively block Skype VoIP, Skype_IM should be blocked, too.
QQVoice	QQVoice is a kind of Web phone. Example: QQVoice.

gulfup.com	gulfup.com allows users to share anything like photos, videos, songs, documents, etc.

Application Name	Description
subscene.com	This website offers downloading and uploading movie subtitles.
mediafire.com	mediafire.com is a website for sharing downloaded files and storing data.
YoudaoNote	YoudaoNote is a NetEase's note-taking software, which can also support multiple platforms and multiple attachment format, and can real-time incrementally synchronize.- Example: YoudaoNote, note.youdao.com
WangSuCDN	WangSuCDN is a CDN accelerating service provided by WangSu Science Tecnology. The protocol identifies the flow of using WangSuCDN. Example: BaiDuWangPan
Wiz	Wiz is a kind of note-taking software, which can support multiple platforms and multiple attachments formats, and can incrementally synchronize in real-time.-Example: Wiz, www.wiz.com
Leanote	Leanote is a suite of software designed for taking and archiving notes, which can also have file attachments and can be sorted into folders, tagged, annotated, edited, given comments and blogs.- Example: www.leanote.om

### 2.3.4 FileShare\_P2P

FileShare\_P2P is defined as file sharing by peer to peer.

Application Name	Description
BT	BitTorrent (BT) is a P2P protocol for multi-point downloading and can be used for many different kinds of applications. The client downloads and uploads data at the same time. Example: BitTorrent, BitSpirit and BitComet.
Thunder	Thunder is a kind of P2P-based software for downloading. Example: Thunder, Thunder movie, Web Thunder, Diandian, Thunder Kankan and Thunder Tingting.
eDonkey_eMule	eMule is a kind of P2P client software which supports files sharing through the Internet. Example: eMule Xtreme, easyMule.
Fasttrack	FastTrack is a protocol used in P2P softwares such as Kazaa, Grokster, iMesh and Morpheus. It is called the second generation P2P protocol. Example: Fasttrack.
DirectConnect	DirectConnect, developed by Neo-Modus, is a kind of free P2P client software with the open source code which supports file exchange and chat. Example: DirectConnect++, StrongDC++.

Application Name	Description
KuGoo	KuGou/KuGoo is a kind of P2P music sharing software in China which supports downloading and online listening. Example: KuGoo music.
POCO	POCO is the largest photo sharing community in the country. Example: POCO Photograph.
Maze	Maze, developed by the Network Lab in Peking University, is a Personal Information Center (PIC) system which has a extremely strong resources and functions. Example: Maze.
Vagaa	Vagaa, developed by a Chinese company, is a kind of P2P file downloading software based on eDonkey and BitTorrent. Example: Vagga. Note: If we want to block Vagga effectively, BT and eDonkey_eMule should be blocked at the same time.
QQDownload	QQDownload, developed by Tencent, is a kind of Internet downloading software. Example: QQDownload. Note: If we want to block QQDownload effectively, BT, eDonkey_eMule, QQFTN should be blocked at the same time.
Filetopia	Filetopia is a kind of P2P software which supports IM, chat and files transmission functions. Example: Filetopia.
Soulseek	SoulSeek is a kind of free P2P files sharing program for MP3 music file sharing. Example: Soulseek.
KooWo	KooWo is a kind of music resource convergence device and player integrated with the functions such as downloading, online play and lyrics synchronized during display of songs and MVs. Example: KooWo music box.
FengXing	FengXing is a kind of Web movie on-demand software. Example: FengXing Web movie.
FlashGet	FlashGet is a kind of P2P file downloading tool and is compatible with multiple downloading modes such as BT, eMule, traditional HTTP and FTP. Example: FlashGet software.
Fs2You	Fs2you provides the online storage service and supports the functions such as uploading, downloading and resource search. Example: RayRource.
Dijjer	Dijjer is a kind of P2P software. With the Dijjer, people can save the bandwidth when releasing streaming media and enjoy a high media transmission speedwhen transferring streaming media. Example: Dijjer.
Vuze_P2P	Vuze, also called Azureus, is a Java-based multi-torrent BT downloading client. Example: Vuze (Azureus).
Foxy	Foxy, released by Foxy Media, Inc., is a kind of traditional Chinese P2P software and is popular in Taiwan, Hong Kong and Macao. Example: Foxy.

Application Name	Description
Zultrax	Zultrax is a kind of free P2P software, using the ZEPP and GNUTELLA networks for file transmission. This software uses the ZEPP network and GNUTELLA for file sharing. Example: Zultrax.
Rodi	Rodi is a kind of open source and Java-based P2P network client. Example: Rodi.
SpeedUpper	SpeedyKu6, developed by Ku6, is a kind of P2P Web TV software for watching online videos. Example: SpeedUpper.
GigaTribe	GigaTribe is a kind of P2P sharing software and all data for transmission is highly encrypted. Example: GigaTribe.
Fileguri	Fileguri is a kind of P2P software in South Korea which has resources searching and downloading functions. Example: Fileguri.
ezPeerPlus	ezPeer is a kind of P2P file sharing software. Users can exchange music, movies, software and pictures. The ezPeer supports functions such as the browser, Chinese instant paging and online chat room. Example: ezPeerPlus.
Aimini	Aimini is a kind of P2P downloading software providing functions such as software sharing and voice chat. Example: Aimini P2P.
Gnutella	Gnutella is a P2P file sharing network protocol. Morpheus is a kind of Gnutella-based network P2P software. Example: GNUTELLA, Morpheus MP3.
BearShare	BearShare is a kind of P2P file sharing software and supports file downloading, sharing and searching. Example: BearShare, imesh.
Ares	Ares is a kind of open-source file sharing tool and supports the sharing of files in different formats. Example: Ares.
AppleJuice	AppleJuice is a kind of P2P file sharing software, supports mutual transmission of files between users and is a variation of eMule. Example: Apple Juice.
Hotline	Hotline consists of the client and server and supports text chat, file downloading and uploading. Example: Hotline.
Kuro_P2P	Kuro is a kind of MP3 sharing software with Chinese interfaces and supports MP3 searching, downloading, playing and burning. This protocol is used to identify the P2P traffic generated by Kuro. Example: Kuro.
LimeWire	LimeWire is a kind of Java platform P2P file sharing software for searching and transmitting files by using the Gnutella network. Example: LimeWire.
Mute	Mute is a kind of P2P file sharing network which uses TCP for communication By default. Example: Kommute Mute.

Application Name	Description
OpenFT	OpenFT is a P2P network. A node submits the shared file list to other nodes to ensure the availability of the files on the network. Example: Kceasy.
Pando	Pando is a kind of P2P software and is used to send .pando files (similar to .torrent file in BT) containing the file location information via Emails for downloading. Example: Pando.
Share	Share, developed by an anonymous Japanese program designer, is a kind of P2P software with the original code closed and is the replacement of winny. Example: Share.
Exosee	Exosee is a kind of P2P sharing software for communities. Example: Exosee.
AntsP2P	ANts P2P is a kind of Java-based anonymous P2P file sharing software, which complies with the GPL. Example: AntsP2P.
Gobby	GoBoogy is a P2P software in Korea which provides the sharing functions of MP3 music files, pictures, video, files, multimedia and national program. -Example: Gobby
TTPlayer	TTPlayer is a kind of music sharing software in China which supports downloading and online listening. Example: TTPlayer.
Huntmine	Huntmine is a kind of P2P download client software which supports files sharing on the Internet. Example: Huntmine
Shareman	Shareman is a popular P2P application in Russian area. Example: Shareman.
StealthNet	StealthNet is a P2P client tool for file sharing. Example: StealthNet.
OFFSystem	OFF is a P2P client tool for file sharing. Example: OFF.
Winny	Winny is a kind of software in Japan for resource sharing based on the P2P technology. Example: Winny.
WinMX	WinMX is a kind of popular P2P download software in Japan. Example: WinMX.
HeuristicP2P	HeuristicP2P_UDP can identify the P2P traffic through the heuristic behavior. The traffic uses UDP as the transport layer protocol.
Mtorrent	Mtorrent is a website that provides streaming movies and enables users to download torrents to mobile phones. Example: mtorrent.mobi.
Shareaza	Shareaza is a P2P file sharing client.

Application Name	Description
ADC_Protocol	ADC is a text protocol for a client-server network similar to Neo-Modus Direct Connect (NMDC). The goal is to create a simple protocol that does not require much effort either in hub or client and is yet extensible.
iMesh	iMesh is an online client for sharing media and files which provides 9 kinds languages and has a centralized P2P network (IM2Net).
Gimme_P2P	Gimme_P2P is a P2P software application developed based on .net which can be used to download files.
KoalaDC	KoalaDC is a kind of open source P2P software based on the DirectConnect and ADC protocols.
TomatoPang	TomatoPang is a kind of P2P file-sharing software in South Korea through which file can be shared directly.
FrostWire	FrostWire is a free and open-source BitTorrent client. This software was first released in September 2004 as a fork of LimeWire.
PeerAware	PeerAware lets you create a workspace for connecting to friends and co-workers.
Xnap	XNap is a free P2P client licensed under the GNU General Public License.
OpenNAP	OpenNap is a server to stop P2P service.
PCast	Pcast is kind of leading wide stream media solution based on the P2P technology developed by Oak Pacific Interactive.
ApexDC++	ApexDC++ is a kind of open source P2P software based on the DirectConnect and ADC protocols.
BCDC++	iDC++ is a kind of open source P2P software based on the DirectConnect and ADC protocols.
StrongDC++	StrongDC++ is a free and open-source, P2P file-sharing client.
iDC++	iDC++ is a free and open-source, P2P file-sharing client.
DAP	Download Accelerator Plus (DAP) is a download manager for Microsoft Windows and Mac OS X. It uses multi-part download to increase speeds, creating multiple connections of different file segments to speed up downloading.
CruXP2P	CruX is a peer-to-peer application superior to LimeWire, Shareaza or Morpheus for Windows, which allows you to download any format of files from numerous popular P2P networks like Gnutella, Gnutella 2 and eDonkey.

Application Name	Description
Phex	Phex is a kind of P2P software that supports file upload and download, sharing and synchronization. Its client and server can alternate.
Filesovermiles	Filesovermiles is a free web-based P2P file transfer service.
Sharetastic	Sharetastic is a downloaded file sharing application. It supports many famous networks, such as the Gnutella2, Gnutella, eDonkey and BitTorrent.
MooPolice	MooPolice is a BitTorrent client, providing download from the website of BitTorrent. It has its new way to search resources and to display its results.
Bitlet	BitLet is a very simple BitTorrent applet that lets you download any torrent file directly in your browser.
Halite	Halite is a LibTorrent- and Boost-based C++ BitTorrent client.
myMusic	myMusic is an online music service with a million Libraries. Example: myMusic.

### 2.3.5 IM\_File\_Transfer

Instant messaging software providing files transfer for two or more people on the network.

Application Name	Description
YahooMsg_Transfer	Yahoo! Messenger is an IM tool released by Yahoo! Which supports text/video/audio chat and file transfer. Example: Yahoo! Messenger.
MSN_Transfer	MSN is an IM tool provided by Microsoft, supporting text chat and file transfer. Example: MSN.
Fetion_Transfer	Fetion, developed by China Mobile, is a kind of software for receiving and transmitting instant messages and SMS messages through mobile phones or PCs. This protocol is used to identify the process of file transmission. Example: China Mobile Fetion.
SinaUC_Transfer	SinaUC is an IM tool provided by Microsoft, supporting text/video chat and file transfer. Example: SinaUC.
ICQ_Transfer	ICQ is a kind of popular instant communication software. This protocol is used to identify ICQ's file transfer traffic. Example: ICQ.
XiaoNeiTong_Transfer	XiaoNeiTong is a chat software dedicated for users on the XiaoNei network. -Example: XiaoNeiTong

Application Name	Description
QQ_Transfer	QQ is an instant online chat tool developed by Tencent and one of the IM tools which owns the largest number of registered members in China. Example: QQ, including the mobile QQ.
Instan_T_File_Transfer	Instan_T is an IM application which used to identify the generated file transfer traffic.
Rediffbol_file_transfer	Rediff Bol is an instant messenger. You can make audio and video calls, send SMS messages and make conference calls by using Rediff Bol.
Mail.ru_Agent_FileTransfer	Mail.ru Agent is a free instant messenger. The protocol identifies the flow of transferring files of Mail.ru Agent on Windows7 only if the SSL decryption function is opened. Example: Mail.ru Agent
Baidu_hi_FileTransfer	This application can be used to control the transfer of files over Baidu Hi.
Softros_Messenger_FileTransfer	Softros LAN messenger is a secure network messaging software application for corporate LANs (local area networks). This protocol is used to identify the generated file transfer traffic.
Ip_Messenger_FileTransfer	IP Messenger is a cross-platform LAN-based Instant Messenger with no need of a server, which used to identify the generated file transfer traffic.
Trillian_FileTransfer	Trillian is a multiprotocol IM application. This protocol is used to identify the generated file transfer traffic.
ICUII_Filetransfer	ICUII is a kind of video software for video conference which can be used to identify its file transfer traffic.
AIM_Express_FileTransfer	AIM Express is a kind of browser-based IM software running on DHTML. It allows users to chat with AIM or Facebook users. This protocol is used to identify the generated file transfer traffic.

Mon.itor.us	mon.itor.us is a web-based application that allows users to monitor servers, website traffic and availability.
Picupine	Pocupine is a web-based photo sharing application. It allows users to upload photos and share them through the generated links.
Quanp	Quanp is an online storage application and client that supports music, video and file upload. Users can create sharing zones and invite others to browse and comment files.
Quickfiles	Quickfiles.net is a free file hosting portal. Users can set passwords for uploaded files and send emails that contain file links to others through this portal directly.

Application Name	Description
Rarhost	Rarhost is a free file hosting website that supports only RAR packages.
S4ve.as	S4ve.as is a website where users can upload and share files.
ShareIt.com	ShareIt.com is a website where users can upload files and share these files with others through download links. Users can email others the download links.
SteekR	SteekR is a file storage website where users can save, access, share and run media files and data files through any PCs.
Upit.to	Upit is a file hosting service that provides unlimited file storage and sharing for users.
Uploadking.de	Uploadking.de is an image hosting website. After users upload images, this website generates a link list. Users can share links or embed these links on their homepages.
Uploadline	Uploadline is a file hosting website where users can save any files on the network servers.
Wiki_upload	Wiki upload is a website where users can upload and share files.
Xpic.us	xpic.us is a Thai website where users can upload files for hosting and sharing.
Ziddu	Ziddu is a media sharing website where users can upload and share images, videos, audio and documents.
IMORY	iMORY is a web service that allows users to upload images. The uploaded images can be printed on T-shirts, toys and cups or saved in photo albums.
Brizzly	Brizzly is a service that enables users to save the uploaded pictures to their own server for sharing.
NS_DBank_Download	DBank is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.dbank.com
NS_DBank_Upload	DBank is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.dbank.com
NS_RayFile_Download	RayFile is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.rayfile.com
NS_RayFile_Upload	RayFile is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.rayfile.com

Application Name	Description
NS_SuNingYun_Download	SuNingYun is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: cloud.suning.com
NS_SuNingYun_Upload	SuNingYun is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: cloud.suning.com
NS_WeiYun_Download	WeiYun is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.weiyun.com
NS_WeiYun_Upload	WeiYun is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.weiyun.com
NS_GleasyDisk_Common	GleasyDisk is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic.
NS_GleasyDisk_Download	GleasyDisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: web.gleasy.com
NS_GleasyDisk_Upload	GleasyDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: web.gleasy.com
NS_4Shared_Upload	Online storage supports the functions of downloading and uploading. Example: 4Shared.com.
NS_AXFC_Upload	AXFC is a kind of online storage popular in Japan. This protocol identifies traffic generated by the uploading function of the online storage. Example: www.axfc.net.
NS_BestSharing_Upload	BestSharing is a kind of popular online storage software. Example: BestSharing.
NS_DepositFiles_Upload	Online storage supports the functions of downloading and uploading. Example: depositfiles.com.
NS_Easy-Share_Upload	Online storage supports the functions of downloading and uploading. Example: easy-share.com.
NS_FileFactory_Upload	FileFactory is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.filefactory.com
NS_FileFront_Upload	Online storage supports the functions of downloading and uploading. Example: www.filefront.com.
NS_FileHost_Upload	Online storage supports the functions of downloading and uploading. Example: filehost.tv.

Application Name	Description
NS_Files_Upload	Online storage supports the functions of downloading and uploading. Example: files.to.
NS_FileSend_Upload	Online storage supports the functions of downloading and uploading. Example: filesend.net.
NS_File-Upload_Upload	Online storage supports the functions of downloading and uploading. Example: file-upload.net.
NS_FileUpYours_Upload	Online storage supports the functions of downloading and uploading. Example: fileupyours.com.
NS_GigaSize_Upload	Online storage supports the functions of downloading and uploading. Example: gigasize.com.
NS_Ifolder_Upload	Online storage supports the functions of downloading and uploading. Example: ifolder.ru.
NS_MediaFire_Upload	Online storage supports the functions of downloading and uploading. Example: mediafire.com.
NS_MegaShares_Upload	Online storage supports the functions of downloading and uploading. Example: megashares.com.
NS_Namipan_Upload	NaMiPan is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.namipan.cn
NS_Orb_Upload	Network storage supports the functions of downloading and uploading. Example: orb.com.
NS_SaveFile_Upload	Network storage supports the functions of downloading and uploading. Example: SaveFile.com.
NS_ShareBee_Upload	Network storage supports the functions of downloading and uploading. Example: sharebee.com.
NS_ShareBigFile_Upload	Online storage supports the functions of downloading and uploading. Example: www.sharebigfile.com.
NS_SimpleUpload_Upload	Network storage supports the functions of downloading and uploading. Example: SimpleUpload.net.
NS_SpeedShare_Upload	Network storage supports the functions of downloading and uploading. Example: speedshare.org.
NS_TurboUpload_Upload	Network storage supports the functions of downloading and uploading. Example: turboupload.com.
NS_Uloz_Upload	Online storage supports the functions of downloading and uploading. Example: ULOZ.to.
NS_UltraShare_Upload	Online storage supports the functions of downloading and uploading. Example: www.ultrashare.net.

Application Name	Description
NS_UltraShareNet_Upload	Network storage supports the uploading and downloading.- Example: ultrashare.net
NS_Up-File_Upload	Online storage supports the functions of downloading and uploading. Example: up-file.com.
NS_Uploaded_Upload	Online storage supports the functions of downloading and uploading. Example: uploaded.to.
NS_Uploading_Upload	Uploading.com provides the file hosting service in free and paid two versions. Besides file hosting service, this website also provides games and premium member services. The uploading limit for a free member is 100 MB.
NS_UploadYourFiles_Upload	Online storage supports the functions of downloading and uploading. Example: uploadyourfiles.de.
NS_Zshare_Upload	Network storage supports the functions of downloading and uploading. Example: zshare.net.
NS_UltraShareNet_Common	UltraShareNet is a network storage,It supports the uploading and downloading. -Example: UltraShare.net
NS_BaiDuYunPan_Common	BaiDuYunPan is a network storage,It supports the uploading and downloading. -Example: yun.baidu.com
NS_BaiDuYunPan_Download	BaiDuYunPan is a network storage,It supports the downloading. - Example: pan.baidu.com BaiDuYun
NS_BaiDuYunPan_Upload	BaiDuYunPan is a network storage,It supports the uploading. - Example: yun.baidu.com BaiDuYun
NS_WeiKeDisk_Common	WeiKeDisk is a network storage,It supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: disk.680.com
NS_WeiKeDisk_Download	WeiKeDisk is a network storage,It supports the uploading and downloading.This application is used to identify its downloading traffic. -Example:disk.680.com
NS_WeiKeDisk_Upload	WeiKeDisk is a network storage,It supports the uploading and downloading,this application is used to identify its uploading traffic. -Example:disk.680.com
NS_GameFront_Download	GameFront is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic.- Example: www.gamefront.com
NS_GameFront_Upload	GameFront is a network storage,It supports the uploading and downloading.This application is used to identify its uploading traffic. - Example: www.gamefront.com
NS_UCYun_Download	UCYun is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic.-Example: disk.yun.uc.cn

Application Name	Description
NS_UCYun_Upload	UCYun is a network storage,It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: disk.yun.uc.cn
NS_360Cloud_Download	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:yunpan.360.cn
NS_360Cloud_Upload	360Cloud is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: yunpan.360.cn
NS_115Disk_Download	115Disk is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: 115.com
NS_115Disk_Upload	115Disk is a network storage,It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: 115.com
NS_Namipan_Common	NaMiPan is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: www.namipan.cn
NS_Ys168_Download	YS168Disk is a network storage. This application is used to identify its downloading traffic. -Example: www.ys168.com
NS_Ys168_Upload	Ys168Disk is a network storage,It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.ys168.com
NS_119g_Download	119g is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:www.119g.com
NS_119g_Upload	119g is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example:www.119g.com
NS_126Disk_Download	126Disk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:yunpan.360.cn
NS_126Disk_Upload	126Disk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example:yunpan.360.cn
NS_Good.gd_Download	Good.gd is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.Good.gd.cn
NS_Good.gd_Upload	Good.gd is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.GoodDisk.cn

Application Name	Description
NS_JinShanDisk_Download	JinShanDisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:yunpan.360.cn
NS_JinShanDisk_Upload	JinShanDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example:www.kuaipan.cn
NS_JinShanEnterprise_Download	JinShan Enterprise Cloud is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: pan.ksyun.com
NS_JinShanEnterprise_Upload	JinShan Enterprise Cloud is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: pan.ksyun.com
NS_Qiannaodisk_Download	Qiannaodisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example:www.qiannao.com
NS_QianNaoDisk_Upload	QianNaoDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example:www.qiannao.com
NS_WoCloud_Download	WoCloud is a network storage that supports the uploading and downloading. The protocol identifies the download traffic for the win7 client. -Example: www.wocloud.com.cn
NS_WoCloud_Upload	WoCloud is a network storage that supports the uploading and downloading. The protocol identifies the upload traffic for the win7 client. -Example: www.wocloud.com.cn
NS_HowFile_Download	HowFile is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.howfile.com
NS_HowFile_Upload	HowFile is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.howfile.com
NS_FezoDisk_Comm	FezoDisk is a network storage,It supports the uploading and downloading. -Example: disk.fezo.com.cn
NS_FezoDisk_Download	FezoDisk is a network storage,It supports the uploading and downloading. -Example: disk.fezo.com.cn
NS_FezoDisk_Upload	FezoDisk is a network storage,It supports the uploading and downloading. -Example: disk.fezo.com.cn
NS_SinaVdisk_Download	SinaVdisk is a network storage.It supports the uploading and downloading. -Example: SinaVdisk,vdisk.weibo.com
NS_SinaVdisk_Upload	SinaVdisk is a network storage.It supports the uploading and downloading. -Example: SinaVdisk,vdisk.weibo.com

Application Name	Description
NS_CM_CaiYun_Download	CM_CaiYun is a network storage, It supports the uploading and downloading. -Example: mCloud,caiyun.feixin.10086.cn
NS_CM_CaiYun_Upload	CM_CaiYun is a network storage, It supports the uploading and downloading. -Example: mCloud,caiyun.feixin.10086.cn
NS_TianYiCloud_Download	TianYiCloud is a network storage, It supports the uploading and downloading. -Example: cloud189,cloud.189.cn
NS_TianYiCloud_Upload	TianYiCloud is a network storage, It supports the uploading and downloading. -Example: cloud189,cloud.189.cn
NS_YiMuHeWangPan_Download	YiMuHeWangPan is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.yimuhe.com
NS_YiMuHeWangPan_Upload	YiMuHeWangPan is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.yimuhe.com
NS_1WangPan_Common	1WangPan is a network storage, It supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: www.1wp.me
NS_1WangPan_Download	1WangPan is a network storage, It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.1wp.me
NS_1WangPan_Upload	1WangPan is a network storage, It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.1wp.me
NS_Qiannaodisk_Common	QianNaoDisk is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: www.qiannao.com
NS_Good.gd_Common	Good.gd is a network storage supports the uploading and downloading. his application is used to identify its persistent-connection traffic. -Example: www.Good.gd.cn
NS_JBOX_Common	JBOX is a network storage, It supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: jbox.jcloud.com
NS_JBOX_Download	JBOX is a network storage, It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: jbox.jcloud.com
NS_JBOX_Upload	JBOX is a network storage, It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: jbox.jcloud.com
NS_KuNiuWangPan_Common	KuNiuWangPan is a network storage, It supports the uploading and downloading. -Example: www.300.la

Application Name	Description
NS_KuNiuWangPan_Download	KuNiuWangPan is a network storage,It supports the uploading and downloading. -Example: www.300.la
NS_KuNiuWangPan_Upload	KuNiuWangPan is a network storage,It supports the uploading and downloading. -Example: www.300.la
NS_163Disk_Upload	163Disk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: www.163disk.com
NS_HongDisk_Common	HongDisk is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: HongDisk,7cbox.cn
NS_HongDisk_Download	HongDisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: HongDisk,7cbox.cn
NS_HongDisk_Upload	HongDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: HongDisk,7cbox.cn
NS_icoffer_Common	Icoffer is a network storage,It supports the uploading and downloading. -Example: icoffer, icoffer.cn
NS_icoffer_Download	Icoffer is a network storage,It supports the uploading and downloading. -Example: icoffer, icoffer.cn
NS_icoffer_Upload	Icoffer is a network storage,It supports the uploading and downloading. -Example: icoffer, icoffer.cn
NS_CTDisk_Download	CTDisk is a network storage,It supports the uploading and downloading. This application is used to identify its downloading traffic. - Example: www.400gb.com
NS_CTDisk_Upload	CTDisk is a network storage,It supports the uploading and downloading. This application is used to identify its uploading traffic. - Example: www.400gb.com
NS_SkyworthCloud_Download	SkyworthCloud is a network storage client,It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: SkyworthCloud IOS version.
NS_SkyworthCloud_Upload	SkyworthCloud is the network disk client,It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: SkyworthCloud IOS version.
NS_KingDee_Download	KingDee is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: cloud.kingdee.com
NS_KingDee_Upload	KingDee is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: cloud.kingdee.com

Application Name	Description
NS_XinHuaDisk_Common	XinHuaDisk is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Client Example:XinHuaDisk PC version. Web Example: vdisk.home.news.cn
NS_XinHuaDisk_Download	XinHuaDisk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Client Example:XinHuaDisk PC version. -Example: vdisk.home.news.cn
NS_XinHuaDisk_Upload	XinHuaDisk is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Client Example:XinHuaDisk PC version. Web Example: vdisk.home.news.cn
NS_Ys168_Common	Ys168Disk is a network storage,It supports the uploading and downloading.This application is used to identify its persistent-connection traffic. -Example: www.ys168.com
NS_HowFile_Common	HowFile is a network storage supports the uploading and uploading. This application is used to identify its downloading traffic. -Example: www.howfile.com
NS_163Disk_Download	163Disk is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: www.163disk.com
NS_WeiYun_Common	WeiYun is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: www.weiyun.com
NS_KingDee_Common	KingDee is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: cloud.kingdee.com
NS_JinShanEnterprise_Common	JinShan Enterprise Cloud is a network storage supports the uploading and downloading. This application is used to identify its persistent-connection traffic. -Example: pan.ksyun.com
NS_WoCloud_Common	WoCloud is a network storage that supports the uploading and downloading. This application is used to identify its persistent-connection traffic;including upload, download, browse, login and other non-distinguishable traffic.-Example: www.wocloud.com.cn
NS_DBank_Common	DBank is a network storage,It supports the uploading and downloading. -Example: www.dbank.com
Google_Drive	Google_Drive is a kind of online cloud storage service destributed by Google . -Example:drive.google.com
NS_Rapidgator_Upload	Rapidgator is a network storage supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: rapidgator.net

Application Name	Description
NS_Rapidgator_Download	Rapidgator is a network storage supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: rapidgator.net
NS_Uploades_Upload	Uploades is a network storage, It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: uploaded.net
NS_Uploades_Download	Uploades is a network storage, It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: uploaded.net
NS_Turbobit_Upload	Turbobit is a network storage, It supports the uploading and downloading. This application is used to identify its uploading traffic. -Example: turbobit.net
NS_Turbobit_Download	Turbobit is a network storage, It supports the uploading and downloading. This application is used to identify its downloading traffic. -Example: turbobit.net
NS_Mega	Mega is a network storage supports the uploading and downloading. -Example: mega.nz
Apple iCloud	Apple icloud storage service, Users can upload data to apple icloud from Iphone. -Example: www.icloud.com
NS_SendSpace	Network storage supports the functions of downloading and uploading. Example: sendspace.com.
Box_FileUpload	Box is a cloud service that provides uploading and downloading files service. The protocol identifies the flow of uploading files. Example: www.box.com, Box
Box_FileDownload	Box is a cloud service that provides uploading and downloading files service. The protocol identifies the flow of downloading files. Example: www.box.com, Box
Box_Browsing	Box is a cloud service that provides uploading and downloading files service. The protocol identifies the flow of browsing. Example: www.box.com, Box
Hicloud	Hicloud is created by HuaWei Technologies Co., Ltd. for Huawei mobile phone users. The protocol identifies all flow of Hicloud. Example: www.hicloud.com, cloud.huawei.com, Hicloud
ZeroPC	ZeroPC is an integrated cloud service online operating system that allows you to synchronize files at the PC and mobile devices. The protocol identifies the flow of browsing. Example: ZeroPC.
ZeroPC_Login	ZeroPC is an integrated cloud service online operating system that allows you to synchronize files at the PC and mobile devices. The protocol identifies the flow of win7 web login. It needs open SSL deciphering. Example: ZeroPC

Application Name	Description
DocuSign	DocuSign is a kind of cloud service providing electronic signature and files automatic management. The protocol identifies the flow of DocuSign browsing. Example: www.docusign.com, DocuSign
DocuSign_Login	The protocol identifies the flow of login from ios platform and webpage, in addition using third-party account to login in android platform. Example: www.docusign.com, DocuSign
Studiopass	Studiopass is a file sharing and collaboration tool with an intuitive, user-friendly interface. The protocol identifies the flow of browsing Studiopass. Example: studiopass.com, Studiopass
Studiopass_FileUpload	Studiopass is a file sharing and collaboration tool with an intuitive, user-friendly interface. The protocol identifies the flow of uploading files. Example: studiopass.com, Studiopass
WeTransfer_FileUpload	WeTransfer is a file transfer site,Receivers can search for uploaded files through links sent by WeTransfer.The protocol identifies the flow of uploading files. Example: www.wetransfer.com, Wetransfer
WeTransfer_FileDownload	WeTransfer is a file transfer site,Receivers can search for uploaded files through links sent by WeTransfer.The protocol identifies the flow of downloading files. Example: www.wetransfer.com, Wetransfer
AdobeCreativeCloud	Adobe Creative Cloud is a software as a service offering from Adobe Systems that gives users access to a collection of software. The protocol identifies the flow of accessing it, uploading and downloading files. Example: creative.adobe.com
AdobeCreativeCloud_FileUpload	The protocol identifies the flow of uploading files from the app Adobe Creative Cloud on Windows7. It needs open the SSL decryption function. Example: Adobe Creative Cloud
Insync	Insync is the most powerful Google Drive client.The protocol identifies the flow of browsing from InSync client on Windows7.It needs open the SSL decryption function. Example: www.insynchq.com, InSync
Insync_FileDownload	Insync is the most powerful Google Drive client.The protocol identifies the flow of downloading files from InSync client on Windows7.It needs open the SSL decryption function. Example: www.insynchq.com, InSync
Insync_FileUpload	Insync is the most powerful Google Drive client.The protocol identifies the flow of uploading files from InSync client on Windows7.It needs open the SSL decryption function. Example: www.insynchq.com, InSync
NS_Nutstore	NS_Nutstore is a kind of convenient, safe and professional netdisk. Example: www.jianguoyun.com, Nutstore

Application Name	Description
NS_Uyun	Uyun is a network storage, which supports the uploading and downloading. This application is used to identify its login and browsing. Part of the uploaded is long link traffic, also identified this protocol temporarily. - Example: www.51gugu.com
NS_Uyun_Upload	Uyun is a network storage that supports uploading and downloading. This application is used to identify its uploading traffic.-Example: www.51gugu.com
NS_Uyun_Download	Uyun is a network storage that supports uploading and downloading. This application is used to identify its downloading traffic. -Example: www.51gugu.com

## 2.3.7 Search\_Engines

Search Engines is a application that gathering information automatically and providing inquiries for users after a certain order.

Application Name	Description
BaiDuZhiDao	Baidu Zhidao is a Chinese question and answer application developed by Baidu. Example: BaiDuZhiDao, wapiknow.baidu.com and zhidao.baidu.com.
12580Client	12580Client is a kind of software that provides the service for searching for food, drink, play, live music and other local entertainment information.
YourSearch	A search engine.
Kino	Kino.to is a search engine, which provides the function to access a database of online movies.
Wikidot_Editing	Wikidot_Editing is an open-source wikipedia.Example: www.wikidot.com
Zwiki_Editing	Zwiki is a wiki engine that is written in Python and based on the Zope web application server.
Twitter_Search	TwitterSearch is a website that enables users to use a keyword or a phrase to sear the results they need. As other search engines such as Google, an advanced search form is available and user can use operators to search.
Delicious	Delicious is a socialized bookmarking website for saving, sharing and searching for web bookmarks.
Deligio	Deligio is a search engine that enables users to search for free software and share software.

Application Name	Description
Alpha	Alpha is a new search website introduced by Yahoo. Users can search for information from a large amount of sources. Users can self-define a search by configuring an information source and adding a new search source.
Scour	Scour is an AJAX-based search engine website. Through the voting and commenting on the search result relevance, this website can quickly provide the most relevant search results.
Videosurf	VideoSurf is a video search engine that can directly decode network videos. Users can filter the search result based on the video characters and locate a specific time point accurately in the video.
Zedmo	Zedmo is a mobile community and search engine.
Vakaka	Vakaka is a P2P network TV application.
b2b.cn	b2b.cn is China's largest and most accurate B2B e-commerce search engine.
bing.com	Microsoft's Bing search engine is the world's leading search engine.
google	Google.com is on the official website of Google search. This protocol contains Google common traffic.
so.com	so.com provides 360's search engine services, including web, news, video and other search products, to bring you safer and cleaner search experience.
sogou.com	sogou.com is the first search engine in the world that has gathered up to 10 billion Chinese web pages. It also offers a convenient and efficient way for Internet users to search for news, music, shopping information and maps.
soku.com	Soku is a professional video search engine launched by China's first video site Youku, providing a search function in the station and the whole network video search. The protocol identifies all flow of soku. -Example: www.soku.com
soso.com	soso.com provides search services about forums, web pages, images and music.
sou300.com	sou300.com is focused on mobile phone and business card search.
wikipedia.org	Wikipedia is an independent, free and open online encyclopedia with participants from around the world. This site uses wiki, meaning that anyone can edit any Wikipedia articles and entries.
ya.ru	A search engine.
indeed.fr	indeed.fr is a vertical search engine for recruitment information.
findprice.com.tw	It is a online shopping price comparision and searching website.

Application Name	Description
nationzoom.com	A search engine.
qvo6.com	QVO6 is the most professional and complete browser on the Internet.
jobrapido.com	jobrapido.com is a job search engine, where you can find all work posted on all U.S. career websites in one place and job vacancies are updated daily.
indeed.com	indeed.com is a job search engine using a totally different search approach.
paginasamarillas.es	A search engine.
biglobe.ne.jp	biglobe.ne.jp is an integrated search portal in Japan.
justdial.com	Justdial is India's No.1 local search engine that provides comprehensive updated information on all B2B and B2C products and services.
airtelforum.com	A search engine.
domaintools.com	domaintools.com allows fuzzy search for the current domain and deleted and expired whois domains.
goo.gl	goo.gl is a website for shortening, sharing and tracing your website.
cleartrip.com	India's online travel agency, providing flight, hotel and train query services.
QUIC	QUIC is Quick UDP Internet Connection which is designed by Google.
BaiDu	BaiDu search is the world's largest Chinese search engine. - Example: www.baidu.com
Google_API	Google_API identifies the API interface traffic of Google products. -Example: Hangouts

## 2.3.8 Software\_Update

Software Update means software programs on a network server upgrade by downloading the patch to complete the software upgrade.

Application Name	Description
WindowsUpdate	WindowsUpdate is an automatic update component. Example: Windows Update.
SymantecLiveUpdate	Symantec is an automatic update component. Example: Symantec Live Update.

Application Name	Description
360Update	360Update is the network traffic generated by 360 security application developed by Qihu company. Example: 360 Security Guard.
QQDoctor	QQDoctor is a security and software management application developed by Tencent. Example: QQDoctor.
RisingUpdate	RisingUpdate is a popular anti-virus application in China. Example: RisingUpdate.
JinShanDuBa	Kingsoft Internet Security is a kind of popular anti-virus software in China developed by Kingsoft. Example: Kingsoft Internet Security.
ESET	ESET is a kind of anti-virus software developed by ESET, providing security services for persons and enterprises all over the world. Example: ESET.
Avast	Avast is a kind of widely applied anti-virus software launched by Avast in Czech. Example: Avast.
JinShanWeiShi	Kingsoft PC Doctor is a kind of popular free anti-virus software developed by Kingsoft in China. Example: Kingsoft PC Doctor.
McAfee	McAfee is kind of popular anti-virus software in the world, which is dedicated to provide the best computer security solutions. Example: McAfee.
TrendMicro	Trend Micro is a kind of popular free anti-virus software in China. Example: Trend Micro.
Kaspersky	Kaspersky is a kind of anti-virus software popular in the world. Example: Kaspersky.
AntiVir	Avira is a kind of anti-virus software popular in the world. Example: Avira.
Panda	Panda Antivirus is a kind of anti-virus software mainly used in the U.S.A. Example: Panda Antivirus.

CligooRobot	CligooRobot is a typical information gathering spider.
ContactBot	ContactBot is a typical information gathering spider.
ConveraCrawler	ConveraCrawler is a typical information gathering spider.
ConveraMultiMedia-Crawler	ConveraMultiMediaCrawler is a typical information gathering spider.
CyberSpyder	CyberSpyder is a typical information gathering spider.
CydralSpider	CydralSpider is a typical information gathering spider.
DBLBot	DBLBot is a typical information gathering spider.
DataparkSearch	DataparkSearch is a typical information gathering spider.
DealGates_Bot	DealGates_Bot is a typical information gathering spider.
DiamondBot	DiamondBot is a typical information gathering spider.
DigOut4U	DigOut4U is a typical information gathering spider.
Discobot	Discobot is a typical information gathering spider.
DittoSpyder	DittoSpyder is a typical information gathering spider.
DoCoMo	DoCoMo is a typical information gathering spider.
DotBot	DotBot is a typical information gathering spider.
DuckDuckBot	DuckDuckBot is a typical information gathering spider.
Dulance_bot	Dulance_bot is a typical information gathering spider.
Dumbot	Dumbot is a typical information gathering spider.
EmailSiphon	EmailSiphon is a typical information gathering spider.
EmailSpider	EmailSpider is a typical information gathering spider.
EnaBot	EnaBot is a typical information gathering spider.
Envolk	Envolk is a typical information gathering spider.
EroCrawler	EroCrawler is a typical information gathering spider.
EsperanzaBot	EsperanzaBot is a typical information gathering spider.
EuripBot	EuripBot is a typical information gathering spider.
Eurobot	Eurobot is a typical information gathering spider.

Application Name	Description
Exabot	Exabot is a typical information gathering spider.
Excalibur_Internet_Spider	Excalibur_Internet_Spider is a typical information gathering spider.
Faxobot	Faxobot is a typical information gathering spider.
FeedHub_FeedDiscovery	FeedHub_FeedDiscovery is a typical information gathering spider.
FollowSite_Bot	FollowSite_Bot is a typical information gathering spider.
Frelicbot	Frelicbot is a typical information gathering spider.
FurlBot	FurlBot is a typical information gathering spider.
FusionBot	FusionBot is a typical information gathering spider.
FyberSpider	FyberSpider is a typical information gathering spider.
GOFORITBOT	GOFORITBOT is a typical information gathering spider.
Gaisbot	Gaisbot is a typical information gathering spider.
GalaxyBot	GalaxyBot is a typical information gathering spider.
GeoBot	GeoBot is a typical information gathering spider.
GeonaBot	GeonaBot is a typical information gathering spider.
Gigabot	Gigabot is a typical information gathering spider.
GingerCrawler	GingerCrawler is a typical information gathering spider.
Ginxbot	Ginxbot is a typical information gathering spider.
Girafabot	Girafabot is a typical information gathering spider.
Googlebot	Googlebot is a typical information gathering spider.
GrandReporter	GrandReporter is a typical information gathering spider.
Grub	Grub is a typical information gathering spider.
Gulper_Web_Bot	Gulper_Web_Bot is a typical information gathering spider.
GurujiBot	GurujiBot is a typical information gathering spider.
HL_Ftien_Spider	HL_Ftien_Spider is a typical information gathering spider.
HTML2JPG_Blackbox	HTML2JPG_Blackbox is a typical information gathering spider.
HTML2JPG_Enterprise_Version	HTML2JPG_Enterprise_Version is a typical information gathering spider.
HTTP_Lite	HTTP::Lite is a typical information gathering spider.

Application Name	Description
HTTrack_Website_Copier	HTTrack_Website_Copier is a typical information gathering spider.
HenryTheMiragoRobot	HenryTheMiragoRobot is a typical information gathering spider.
HouxouCrawler	HouxouCrawler is a typical information gathering spider.
Htdig	Htdig is a typical information gathering spider.
Huasai	Huasai is a typical information gathering spider.
HyperEstraiier	HyperEstraiier is a typical information gathering spider.
IIITBOT	IIITBOT is a typical information gathering spider.
IP2LocationBot	IP2LocationBot is a typical information gathering spider.
IP2MapBot	IP2MapBot is a typical information gathering spider.
IPiumBot	IPiumBot is a typical information gathering spider.
IRLbot	IRLbot is a typical information gathering spider.
IlseBot	IlseBot is a typical information gathering spider.
IrssiUrlLog	IrssiUrlLog is a typical information gathering spider.
JetBot	JetBot is a typical information gathering spider.
Jyrobot	Jyrobot is a typical information gathering spider.
LapozzBot	LapozzBot is a typical information gathering spider.
Larbin	Larbin is a typical information gathering spider.
LinkWalker	LinkWalker is a typical information gathering spider.
Linklint	Linklint is a typical information gathering spider.
MJ12bot	MJ12bot is a typical information gathering spider.
MQbot	MQbot is a typical information gathering spider.
MVAClient	MVAClient is a typical information gathering spider.
Mabontland	Mabontland is a typical information gathering spider.
MojeekBot	MojeekBot is a typical information gathering spider.
MyFamilyBot	MyFamilyBot is a typical information gathering spider.
NG_Search	NG_Search is a typical information gathering spider.
NetResearchServer	NetResearchServer is a typical information gathering spider.
NetSongBot	NetSongBot is a typical information gathering spider.
NetWhatCrawler	NetWhatCrawler is a typical information gathering spider.

Application Name	Description
NextGenSearchBot	NextGenSearchBot is a typical information gathering spider.
NextopiaBOT	NextopiaBOT is a typical information gathering spider.
Nusearch_Spider	Nusearch_Spider is a typical information gathering spider.
NutchCVS	NutchCVS is a typical information gathering spider.
OOZBOT	OOZBOT is a typical information gathering spider.
Obot	Obot is a typical information gathering spider.
OmniExplorer_Bot	OmniExplorer_Bot is a typical information gathering spider.
Orbiter	Orbiter is a typical information gathering spider.
PageBitesHyperBot	PageBitesHyperBot is a typical information gathering spider.
PeerFactor_Crawler	PeerFactor_Crawler is a typical information gathering spider.
Pete_Spider	Pete_Spider is a typical information gathering spider.
PipeLine_Spider	PipeLine_Spider is a typical information gathering spider.
Polybot	Polybot is a typical information gathering spider.
Pompos	Pompos is a typical information gathering spider.
Psbot	Psbot is a typical information gathering spider.
PycURL	PycURL is a typical information gathering spider.
RAMPyBot	RAMPyBot is a typical information gathering spider.
Rankivabot	Rankivabot is a typical information gathering spider.
RufusBot	RufusBot is a typical information gathering spider.
SBIder	SBIder is a typical information gathering spider.
SEOChat	SEOChat is a typical information gathering spider.
ScSpider	ScSpider is a typical information gathering spider.
ScrollSpider	ScrollSpider is a typical information gathering spider.
Scrubby	Scrubby is a typical information gathering spider.
SearchSight	SearchSight is a typical information gathering spider.
Seekbot	Seekbot is a typical information gathering spider.
Semanticdiscovery	Semanticdiscovery is a typical information gathering spider.
Sensis_Web_Crawler	Sensis_Web_Crawler is a typical information gathering spider.
SeznamBot	SeznamBot is a typical information gathering spider.
ShablastBot	ShablastBot is a typical information gathering spider.

Application Name	Description
SheenBot	SheenBot is a typical information gathering spider.
Shim_Crawler	Shim_Crawler is a typical information gathering spider.
Shoula_Robot	Shoula_Robot is a typical information gathering spider.
SindiceBot	SindiceBot is a typical information gathering spider.
Sirketcebot	Sirketcebot is a typical information gathering spider.
SiteCrawler	SiteCrawler is a typical information gathering spider.
SiteSucker	SiteSucker is a typical information gathering spider.
SiteWinder	SiteWinder is a typical information gathering spider.
Snapbot	Snapbot is a typical information gathering spider.
Sogou_Spider	Sogou_Spider is a typical information gathering spider.
Sosoimagespider	Sosoimagespider is a typical information gathering spider.
Sosospider	Sosospider is a typical information gathering spider.
Speedy_Spider	Speedy_Spider is a typical information gathering spider.
Spock_Crawler	Spock_Crawler is a typical information gathering spider.
SpokeSpider	SpokeSpider is a typical information gathering spider.
Sqworm	Sqworm is a typical information gathering spider.
StackRambler	StackRambler is a typical information gathering spider.
SuperBot	SuperBot is a typical information gathering spider.
SurveyBot	SurveyBot is a typical information gathering spider.
SybolBot	SybolBot is a typical information gathering spider.
SynooBot	SynooBot is a typical information gathering spider.
TV_Browser	TV_Browser is a typical information gathering spider.
Tasaspider	Tasaspider is a typical information gathering spider.
Technoratibot	Technoratibot is a typical information gathering spider.
Teoma	Teoma is a typical information gathering spider.
TheSuBot	TheSuBot is a typical information gathering spider.
Thumbnail.CZ_robot	Thumbnail.CZ_robot is a typical information gathering spider.
TinEye	TinEye is a typical information gathering spider.
Trailfire_bot	Trailfire_bot is a typical information gathering spider.
TutorGigBot	TutorGigBot is a typical information gathering spider.

Application Name	Description
URL_Spider_Pro	URL_Spider_Pro is a typical information gathering spider.
VMBot	VMBot is a typical information gathering spider.
VadixBot	VadixBot is a typical information gathering spider.
Vagabondo	Vagabondo is a typical information gathering spider.
VisBot	VisBot is a typical information gathering spider.
VoilaBot	VoilaBot is a typical information gathering spider.
Vortex	Vortex is a typical information gathering spider.
W3C_Checklink	W3C_Checklink is a typical information gathering spider.
W3CRobot	W3CRobot is a typical information gathering spider.
Web_Dumper	Web_Dumper is a typical information gathering spider.
WebAlta_Crawler	WebAlta_Crawler is a typical information gathering spider.
WebCollage	WebCollage is a typical information gathering spider.
WebFerret	WebFerret is a typical information gathering spider.
WebSnatcher	WebSnatcher is a typical information gathering spider.
WebarooBot	WebarooBot is a typical information gathering spider.
WinkBot	WinkBot is a typical information gathering spider.
WoFindeIch_Robot	WoFindeIch_Robot is a typical information gathering spider.
Xaldon_WebSpider	Xaldon_WebSpider is a typical information gathering spider.
YaDirectBot	YaDirectBot is a typical information gathering spider.
YahooFeedSeeker	YahooFeedSeeker is a typical information gathering spider.
Yanga_WorldSearch_Bot	Yanga_WorldSearch_Bot is a typical information gathering spider.
Yobot	Yobot is a typical information gathering spider.
YoudaoBot	YoudaoBot is a typical information gathering spider.
Zao	Zao is a typical information gathering spider.
Zealbot	Zealbot is a typical information gathering spider.
Zeusbot	Zeusbot is a typical information gathering spider.
ZipppBot	ZipppBot is a typical information gathering spider.
ZoomSpider	ZoomSpider is a typical information gathering spider.
ZyBorg	ZyBorg is a typical information gathering spider.

Application Name	Description
Ah_Ha.com_Crawler	Ah_Ha.com_Crawler is a typical information gathering spider.
Aipbot	Aipbot is a typical information gathering spider.
Antibot	Antibot is a typical information gathering spider.
Aranhabot	Aranhabot is a typical information gathering spider.
Asterias	Asterias is a typical information gathering spider.
Atraxbot	Atraxbot is a typical information gathering spider.
Bitlybot.spider	Bitlybot.spider is a typical information gathering spider.
Dodgebot	Dodgebot is a typical information gathering spider.
Exooba_Crawler	Exooba_Crawler is a typical information gathering spider.
Favorstarbot	Favorstarbot is a typical information gathering spider.
Flatlandbot	Flatlandbot is a typical information gathering spider.
gURL_Checker	gURL_Checker is a typical information gathering spider.
GenieBot	GenieBot is a typical information gathering spider.
Hbtronix.spider	Hbtronix.spider is a typical information gathering spider.
Holmes	Holmes is a typical information gathering spider.
Ilsearchbot	Ilsearchbot is a typical information gathering spider.
iGoogle	iGoogle is a typical information gathering spider.
Iaskspider	Iaskspider is a typical information gathering spider.
Iisbot	Iisbot is a typical information gathering spider.
Imspider	Imspider is a typical information gathering spider.
Mogimogi	Mogimogi is a typical information gathering spider.
My_robot	My_robot is a typical information gathering spider.
NaoFavicon4IE	NaoFavicon4IE is a typical information gathering spider.
Nicebot	Nicebot is a typical information gathering spider.
Noxtrumbot	Noxtrumbot is a typical information gathering spider.
Omgilibot	Omgilibot is a typical information gathering spider.
OnCHECK_Robot	OnCHECK_Robot is a typical information gathering spider.
Schibstedsokbot	Schibstedsokbot is a typical information gathering spider.
Silk	Silk is a typical information gathering spider.
Thumbshots_De_Bot	Thumbshots_De_Bot is a typical information gathering spider.

Application Name	Description
Urlfan_Bot	Urlfan_Bot is a typical information gathering spider.
Void_Bot	Void_Bot is a typical information gathering spider.
Voyagerbot	Voyagerbot is a typical information gathering spider.
Woriobot	Woriobot is a typical information gathering spider.
Yacybot	Yacybot is a typical information gathering spider.
YoogliFetchAgent	YoogliFetchAgent is a typical information gathering spider.
Yoono_Crawler	Yoono_Crawler is a typical information gathering spider.
Zspider	Zspider is a typical information gathering spider.
BingBot	BingBot is a typical information gathering spider.
BloglinesCrawler	BloglinesCrawler is a typical information gathering spider.
MSN_Robot	MSN_Robot is a typical information gathering spider.
MSN_Media_Bot	MSN_Media_Bot is a typical information gathering spider.
OpenWebSpiderBot	OpenWebSpiderBot is a typical information gathering spider.
Oracle_Search_robot	Oracle_Search_robot is a typical information gathering spider.
Sohu_search_robot	Sohu_search_robot is a typical information gathering spider.
YahooBot	YahooBot is a typical information gathering spider.
Mercator	Mercator is a typical information gathering spider.
Arexera	Arexera is a typical information gathering spider.
CyberPatrol_SiteCat_Webbot	CyberPatrol_SiteCat_Webbot is a typical information gathering spider.
Download_Tipp_Robot	Download_Tipp_Robot is a typical information gathering spider.
AbontiBot	AbontiBot is a typical information gathering spider.
Ackerm_search_robot	Ackerm_search_robot is a typical information gathering spider.
Amibot	Amibot is a typical information gathering spider.
AntBot	AntBot is a typical information gathering spider.
ASAHA_search_Engine	ASAHA_search_Engine is a typical information gathering spider.
Axmo_search_robot	Axmo_search_robot is a typical information gathering spider.
Bitacle_bot	Bitacle_bot is a typical information gathering spider.
CCBot	CCBot is a typical information gathering spider.

Application Name	Description
CipinetBot	CipinetBot is a typical information gathering spider.
Claymont_search_robot	Claymont_search_robot is a typical information gathering spider.
Clushbot	Clushbot is a typical information gathering spider.
CnetBot	CnetBot is a typical information gathering spider.
Research_Institute_Crawler	Research_Institute_Crawler is a typical information gathering spider.
CovarioBot	CovarioBot is a typical information gathering spider.
Daypopbot	Daypopbot is a typical information gathering spider.
Denmex_Websearch_robot	Denmex_Websearch_robot is a typical information gathering spider.
DNS_Digger_Robot	DNS_Digger_Robot is a typical information gathering spider.
DtsearchSpider	DtsearchSpider is a typical information gathering spider.
EgotoBot	EgotoBot is a typical information gathering spider.
Enfish_Tracker	Enfish_Tracker is a typical information gathering spider.
EntirewebBot	EntirewebBot is a typical information gathering spider.
EureksterBot	EureksterBot is a typical information gathering spider.
EvaalSE_bot	EvaalSE_bot is a typical information gathering spider.
Everatom.com_Bot	Everatom.com_Bot is a typical information gathering spider.
EvriBot	EvriBot is a typical information gathering spider.
Factbites_search_robot	Factbites_search_robot is a typical information gathering spider.
FAST_Enterprise_Crawler	FAST_Enterprise_Crawler is a typical information gathering spider.
FineBot	FineBot is a typical information gathering spider.
Flexum_spider	Flexum_spider is a typical information gathering spider.
Folkd.com_Spider	Folkd.com_Spider is a typical information gathering spider.
FreshNotes_crawler	FreshNotes_crawler is a typical information gathering spider.
GenieKnows	GenieKnows is a typical information gathering spider.
GlobalSpecBot	GlobalSpecBot is a typical information gathering spider.
HomerwebBot	HomerwebBot is a typical information gathering spider.
Hyperix	Hyperix is a typical information gathering spider.

Application Name	Description
IceRocket_Web_search_robot	IceRocket_Web_search_robot is a typical information gathering spider.
ICSBot	ICSBot is a typical information gathering spider.
InsitorBot	InsitorBot is a typical information gathering spider.
IprospectBot	IprospectBot is a typical information gathering spider.
IssueCrawler	IssueCrawler is a typical information gathering spider.
JamBot	JamBot is a typical information gathering spider.
Jayde_Crawler	Jayde_Crawler is a typical information gathering spider.
KakleBot	KakleBot is a typical information gathering spider.
KinjaBot	KinjaBot is a typical information gathering spider.
KrugleBot	KrugleBot is a typical information gathering spider.
LexiBot	LexiBot is a typical information gathering spider.
LexxeBot	LexxeBot is a typical information gathering spider.
LijitSpider	LijitSpider is a typical information gathering spider.
Linguee_Bot	Linguee_Bot is a typical information gathering spider.
LocalcomBot	LocalcomBot is a typical information gathering spider.
MapoftheInternet.com_Bot	MapoftheInternet.com_Bot is a typical information gathering spider.
MaxomoBot	MaxomoBot is a typical information gathering spider.
MegaDownload_Robot	MegaDownload_Robot is a typical information gathering spider.
MnogosearchBot	MnogosearchBot is a typical information gathering spider.
MozdexBot	MozdexBot is a typical information gathering spider.
Multicrawler	Multicrawler is a typical information gathering spider.
NEC_robot	NEC_robot is a typical information gathering spider.
Netprospector_JavaCrawler	Netprospector_JavaCrawler is a typical information gathering spider.
NetSeer_crawler	NetSeer_crawler is a typical information gathering spider.
Netsprint_robot	Netsprint_robot is a typical information gathering spider.
NewstinBot	NewstinBot is a typical information gathering spider.
NokodoBot	NokodoBot is a typical information gathering spider.
Objects_search_robot	Objects_search_robot is a typical information gathering spider.

Application Name	Description
Onet_PIBot	Onet_PIBot is a typical information gathering spider.
OntoSpider	OntoSpider is a typical information gathering spider.
PagebullBot	PagebullBot is a typical information gathering spider.
PEERbot	PEERbot is a typical information gathering spider.
Pico_search_robot	Pico_search_robot is a typical information gathering spider.
PostPost	PostPost is a typical information gathering spider.
PulseBot	PulseBot is a typical information gathering spider.
QweeryBot	QweeryBot is a typical information gathering spider.
RedCarpet_crawler	RedCarpet_crawler is a typical information gathering spider.
RixBot	RixBot is a typical information gathering spider.
RSS_Micro_robot	RSS_Micro_robot is a typical information gathering spider.
ScanWeb	ScanWeb is a typical information gathering spider.
ScholarUniverseBot	ScholarUniverseBot is a typical information gathering spider.
ScoutAbout	ScoutAbout is a typical information gathering spider.
SearchExpress_Spider	SearchExpress_Spider is a typical information gathering spider.
SearchhippoBot	SearchhippoBot is a typical information gathering spider.
SearchitBot	SearchitBot is a typical information gathering spider.
SeedBot	SeedBot is a typical information gathering spider.
ShopWikiBot	ShopWikiBot is a typical information gathering spider.
SkizzleBot	SkizzleBot is a typical information gathering spider.
SlysearchBot	SlysearchBot is a typical information gathering spider.
Sphere_Scout_robot	Sphere_Scout_robot is a typical information gathering spider.
SphiderBot	SphiderBot is a typical information gathering spider.
Teemer_crawler	Teemer_crawler is a typical information gathering spider.
TheFindBot	TheFindBot is a typical information gathering spider.
TygoBot	TygoBot is a typical information gathering spider.
UKWizzBot	UKWizzBot is a typical information gathering spider.
UpdatedBot	UpdatedBot is a typical information gathering spider.
VeryGoodsearchBot	VeryGoodsearchBot is a typical information gathering spider.
VonnaBot	VonnaBot is a typical information gathering spider.

Application Name	Description
VSE	VSE is a typical information gathering spider.
Walhello_Internet_search_robot	Walhello_Internet_search_robot is a typical information gathering spider.
WavefireBot	WavefireBot is a typical information gathering spider.
Web2ExpressBot	Web2ExpressBot is a typical information gathering spider.
WebCompass	WebCompass is a typical information gathering spider.
WebFindBot	WebFindBot is a typical information gathering spider.
WebsquashBot	WebsquashBot is a typical information gathering spider.
YoonoBot	YoonoBot is a typical information gathering spider.
YottaCarsBot	YottaCarsBot is a typical information gathering spider.
Zetbot_robot	Zetbot_robot is a typical information gathering spider.
ZschoBot	ZschoBot is a typical information gathering spider.
Agadine_robot	Agadine_robot is a typical information gathering spider.
Ansearch	Ansearch is a typical information gathering spider.
Axada_search_Germany_robot	Axada_search_Germany_robot is a typical information gathering spider.
Boitho_search_robot	Boitho_search_robot is a typical information gathering spider.
Burf.com_robot	Burf.com_robot is a typical information gathering spider.
Catall_Spider	Catall_Spider is a typical information gathering spider.
Ccubee	Ccubee is a typical information gathering spider.
Comrite_robot	Comrite_robot is a typical information gathering spider.
Cuasarbot	Cuasarbot is a typical information gathering spider.
Die_Kraehe_Meta	Die_Kraehe_Meta is a typical information gathering spider.
Drecombot	Drecombot is a typical information gathering spider.
Eventax_robot	Eventax_robot is a typical information gathering spider.
Favo.eu_crawler	Favo.eu_crawler is a typical information gathering spider.
FindPalBot	FindPalBot is a typical information gathering spider.
FireballBot	FireballBot is a typical information gathering spider.
GallentBot	GallentBot is a typical information gathering spider.
IBMs_Almaden_Research_robot	IBMs_Almaden_Research_robot is a typical information gathering spider.

Application Name	Description
IgdeBot	IgdeBot is a typical information gathering spider.
IlTrovatore	IlTrovatore is a typical information gathering spider.
LibertyWBot	LibertyWBot is a typical information gathering spider.
Linknzbot	Linknzbot is a typical information gathering spider.
Mahiti_Crawler	Mahiti_Crawler is a typical information gathering spider.
Mainseek	Mainseek is a typical information gathering spider.
MetaspinnerBot	MetaspinnerBot is a typical information gathering spider.
Misterbot	Misterbot is a typical information gathering spider.
NaverBot	NaverBot is a typical information gathering spider.
NetinfoBot	NetinfoBot is a typical information gathering spider.
Netluchs_robot	Netluchs_robot is a typical information gathering spider.
Ozelot	Ozelot is a typical information gathering spider.
Pogodak	Pogodak is a typical information gathering spider.
Qihoo	Qihoo is a typical information gathering spider.
RamBot	RamBot is a typical information gathering spider.
SagoolBot	SagoolBot is a typical information gathering spider.
ScoutJetBot	ScoutJetBot is a typical information gathering spider.
Search.ch_robot	Search.ch_robot is a typical information gathering spider.
SearchByUSA_robot	SearchByUSA_robot is a typical information gathering spider.
Searchengine_submission_robot	Searchengine_submission_robot is a typical information gathering spider.
SemagerBot	SemagerBot is a typical information gathering spider.
Seznam_search_robot	Seznam_search_robot is a typical information gathering spider.
Sicher_durchs_Netz_DatenBot	Sicher_durchs_Netz_DatenBot is a typical information gathering spider.
SitiDi.net_robot	SitiDi.net_robot is a typical information gathering spider.
Suchpadbot	Suchpadbot is a typical information gathering spider.
Szukacz.pl_robot	Szukacz.pl_robot is a typical information gathering spider.
Terraminds_bot	Terraminds_bot is a typical information gathering spider.
Traazibot	Traazibot is a typical information gathering spider.
TrendTech_search	TrendTech_search is a typical information gathering spider.

Application Name	Description
W3Sitesearch	W3Sitesearch is a typical information gathering spider.
wadainoJp	wadainoJp is a typical information gathering spider.
WebCorp	WebCorp is a typical information gathering spider.
WebduniaBot	WebduniaBot is a typical information gathering spider.
WebsearchfBot	WebsearchfBot is a typical information gathering spider.
Yarienavoir	Yarienavoir is a typical information gathering spider.
Yelo.no_robot	Yelo.no_robot is a typical information gathering spider.
Zearchit	Zearchit is a typical information gathering spider.

## 2.4 Network

### 2.4.1 Attack

Network attacked software.

Application Name	Description
Worm	Traffic identified by the worm feature

### 2.4.2 Encrypted\_Tunnel

Encrypted tunnel refers to the use of network tunneling protocol to transmit another network protocol.

Application Name	Description
TOR	The Onion Router (TOR) is used to implement the second generation onion routing. Users perform anonymous communications through the TOR on the Internet. Example: TOR.
PacketiX	PacketiX VPN client simulates the working sequence of Ethernet network in order to implement the VPN function. Example: PacketiX VPN.
JAP	JAP is a proxy server which can be used for anonymously browsing Web pages. Example: JAP.
GRE	Generic Routing Encapsulation (GRE) defines encapsulating some other network layer protocols on a network layer protocol.

Application Name	Description
HamachiVPN	HamachiVPN is a kind of software with no need of configuration, which can be used to set up a direct connection between two computers through NAT traversal. Example: HamachiVPN.
Hopster	Hopster is a kind of software for breaking through firewalls and implementing the normal connection between the MSN and other IM software. Example: Hopster.
IKEv2	Internet key exchange protocol (IKE) is used to exchange and manage the key in the VPN. IKEv2 is an enhanced version of IKEv1. Example: IKE
IKEv1	Internet key exchange protocol (IKE) is used to exchange and manage the encrypted key on the VPN. Example: IPsec
L2TP	Layer 2 tunnel protocol (L2TP) is a used to encapsulate network protocols to PPP and then encapsulate entire data package to the tunnel protocol. Example: L2TP.
OpenVPN	OpenVPN is a kind of software package compiled by James Yonan in the earlier stage which used to create a virtual private network encryption channel. Example: OpenVPN.
PPTP	Point-to-Point Tunneling Protocol (PPTP) is a kind of network technology supporting the multi-protocol virtual private network. Example: PPTP.
STUN	STUN is a kind of protocol for real-time audio, video and messages pass through the NAT. Example: STUN.
VPN_Vtun	VTun is used to set up the virtual channel on TCP/IP and the number of channels is not restricted. Example: Vtun.
VPN-X	VPN-X is a cross-platform P2P/SSL/TLS VPN solution developed by BirdsSoft. Example: Cross-platform P2P/SSL/TLS VPN solution.
IPSec	IPSec uses the encrypted security service to guarantee the communication security on the networks of Internet protocols
Teredo	Teredo is an address allocating and auto-tunneling technology, which can span the IPv4 Internet and achieve IPV6 unicast connection. Example: Teredo.
HotSpot	HotSpot is a kind of free foreign proxy software for automatic VPN searching, which can effectively protect individual privacy and visit the website you want. Example: HotSpot.
VPN_Connect	VPN_Connect is a transmission layer protocol which similar to the role of TCP and UDP.
IPV6_OVER_IPV4	IPV6_OVER_IPV4 is a tunneling protocol used to encapsulate the IPV6 package into the IPV4 package.

Application Name	Description
PPTP_GRE	PPTP_GRE is a data channel created after the PPTP signal connected.
YourFreedom	YourFreedom is a kind of VPN software. Example: YourFreedom.
Waysonline	Waysonline is a popular proxy application in China. Example: Waysonline.
LoopcVPN	LoopcVPN is a kind of popular free proxy software in China providing proxy and network acceleration services. Example: LoopcVPN.
CyberGhost	CyberGhost VPN is a kind of popular German proxy software that provides commercial VPN services. Example: CyberGhost VPN.
FreeGate	FreeGate is a kind of proxy software. Example: FreeGate.
TinyVPN	TinyVPN is a Japanese virtual private network (VPN) application developed by Shimousa Systems Corporation. The protocol identifies the flow of client connect. Example: TinyVPN
ZenMate	ZenMate is a kind of proxy software that makes user browsing websites anonymous. Example: ZenMate
Lantern	Lantern is a free peer to peer network proxy software. The protocol identifies the flow of using Lantern. Example: Lantern
Betternet	Betternet is a free over-the-wall software. software. Example: Betternet

## 2.4.3 Infrastructure

Network protocol is a set of rules based on network equipment, network servers, computers and other communication. Common protocols are: HTTP protocol, DNS protocols.

Application Name	Description
FTP	FTP is the abbreviation of File Transfer Protocol which also has a specific software can be applied to various applications to control file's two-way transmission on the Internet. Example: CuteFTP.
FTPS	FTPS is an extension to the commonly used File Transfer Protocol (FTP).
Route	Route.Border Gateway Protocol(BGP) is Internet external gateway route protocol.
Binkp	Binkp is a kind of Fidonet mail transmission protocol based on trustful connections. Example: Argus.

Application Name	Description
TACACS+	TACACS is a kind of computer protocol for authentication and is used to allow users to remotely access servers and authenticate servers. The TACACS determines whether users have rights to access the networks. Example: TACACS+.
RTMPT	RTMPT protocol is an extension of the HTTP protocol, which is basically used to control permanence of net connection. Example: www.bbc.co.uk.
T125	T125 is a multi-point communication service protocol.
CMPP	China Mobile Peer to Peer protocol provides the services of sending and receiving short messages. Example: CMPP.
HTTP	Hyper Text Transfer Protocol (HTTP) is the protocol of transmitting hyper texts to the local browser from the WWW server -Example: HTTP.
NNTP	NNTP is used to transmit articles, news and messages between message servers. Example: Network news group transfer protocol.
COTP	Connection-Oriented Transport Protocol (COTP) is used to transmit data between network users while currently replaced by TCP. Example: COTP.
IMAP	Internet Message Access Protocol (IMAP) is a kind of standard protocol for accessing Emails on a remote server. Example: IMAP (Delphi).
MAPI_OETP_Exchange	Mail or Messaging Application Programming Interface (MAPI) is a kind of open interface that programmers used to create mail writing and workgroup programs. Example: OETP_MAPI_ExchangeMapiCdo and Outlook.
POP3	POP3 is a kind of application layer Internet standard protocol and is used for the local Email Client to receive mails from remote servers. Example: Outlook, Foxmail, Exchange
SMTP	Simple Mail Transfer Protocol (SMTP) is applicable to transmit emails between Internet. Example: Outlook, Foxmail and Exchange.
X.400	x.400 is a mail transmission protocol standard. x.400 connector is a connection mode following this standard. Example: Exchange.
LDAP	LDAP is a kind of protocol that uses the directory service to query and modify data. Example: openldap.
Avi	Avi_Streaming is a common streaming media format. Example: Avi streaming.
Flash	Flash_Streaming is a common streaming media format. Example: Flash streaming.

Application Name	Description
Mov	Mov is a common streaming media format. Example: Mov streaming.
Mp3	Mp3 is a common streaming media format. Example: mp3 streaming.
Mpeg	Mpeg is a common streaming media format. Example: Mpeg streaming.
Ogg	Ogg is a common streaming media format. Example: Ogg streaming.
RM	Real is a common streaming media format. Example: Real streaming.
Wma	Wma is a common streaming media format. Example: Wma streaming.
Wmv	Wmv is a common streaming media format. Example: Wmv streaming.
MMS1	Microsoft Media Server (MMS) is a kind of private network protocol of Microsoft and is used to transmit data in the Windows media service. Example: Windows Media Player.
RDT	Real-time data transmission protocol is a kind of protocol for transmitting files developed by Reall. Example: RDT.
RTMP	RTMP is a protocol developed by Adobe which used to exchange audio, video and other data between Flash player and server on the Internet. Example: RTMP.
RTSP	Real Time Streaming Protocol (RTSP) is a protocol in the application layer in the TCP/IP protocol system and is a kind of IETF RFC standard submitted by Columbia University, Netscape and RealNetworks. Example: Realplayer
QinQ	QinQ extends the number of VLANs by stacking two 802.1Q packet heads.
SSL	SSL is a kind of Web-based application security protocol submitted by Netscape which supports the data encryption, server authentication, message integrity and optional client authentication for TCP/IP connection. Example: SSL.
MEGACO	MEGACO is a kind of gateway protocol on the internet which can control the media information flow and supports the VoIP services between the IP networks and PSTN networks or internal the IP networks. Example: MEGACO.
H323	H.323 is a kind of protocol defined by ITU-T for transmitting voice and video data on the packet switching network. Example: H.323 video conferencing multicast server.

Application Name	Description
SIP	Session Initiation Protocol (SIP), is a signaling control protocol at the application layer and is used to create, modify and release the session of one or more participants. Example: sipgate x_lite.
MGCP	Media Gateway Control Protocol (MGCP) is a VoIP protocol and is applicable to separated multimedia gateway units. Example: MGCP.
RTCP	RTP control protocol (RTCP) supports the control information and bandwidth for the RTP stream. Example: realplayer and NetMeeting.
RTP	Real-time Transmission Protocol (RTP) is a software submitted by the IETF, which describes the standard data package format of audios and videos transmitted on the Internet. Example: GoogleTalk.
IAX	Inter-Asterisk eXchange (IAX) is used to communicate with servers which developed by Digium. Example: zoiper.
H245	H.245 is a kind of signaling control protocol in the H.323 system and is applicable to end-to-end H.245 information exchanging between H.323 endpoints or terminals. Example: NetMeeting.
RADIUS	Remote Authentication Dial In User Service (RADIUS) is a remote dial-in authentication system provided by Livingston for authentication and billing of dial-in users. Example: FreeRADIUS.
SNMP	SNMP can manages the communication lines which developed on the basis of the SGMP.
DNS	Domain Name System (DNS) names computers and network services in the TCP/IP networks and parses domain names. Example: Microsoft Windows XP Professional.
DHCP	Dynamic Host Configuration Protocol (DHCP) is used to allocate dynamical IP addresses for network clients. Example: DHCP.
NTP	NTP can be used to synchronize a local computer time with an Internet time server. Example: ExpressTimeSync.
SSDP	SSDP is applicable to the service discovery. The control point can locate the interesting resources in the network and check whether the resources are available through SSDP. Example: VNC.
Kerberos	Kerberos is a computer network authentication protocol and allows an entity to communicate with other entities in the unsafe network environments to prove its own identification by a safe way. Example: Kerberos.
MDNS	Multicast DNS(MDNS) can be used by a DNS client computer to parse the name on the local network segment when the DNS server is unavailable. Example: MDNS.

Application Name	Description
Daytime	Daytime is a kind of protocol to return to the current time and date for measurement and debugging. Example: Daytime standard protocol.
Echo	The echo protocol is used to send messages for system debugging and detection. Example: echo protocol.
TFTP	TFTP is Trivial File Transfer Protocol.. Example: CuteFTP.
SMB	SMB is a protocol developed by IBM, which can be used to define the shared files, printers and serial ports. Example: Server information block protocol.
NFS	NFS allows one system to share directories and files with other clients on the internet. Through the NFS, users and program can view the files on a remote system like the way they view the local files. Example: NFS protocol.
Whois	Whois is a kind of database to inquire whether a domain name is registered or not, if registered, the details of the domain name can also be found. Example: Whois.
IPP	IPP provides a standard protocol for remote printing, which can be used to manage the printing. Example: IPP.
NetBios	NetBios is developed by IBM, which defines a standard method of a software interface, supports the communication interface between application programs and connection media. This is a sub-protocol of NetBios.
GTP	GPRS tunneling protocol is a kind of IP-based protocol supporting the GPRS in the GSM and UMTS networks. Example: GTP.
k-java	Java is a new programming language developed by Sun company. K-JAVA is a kind of Java 2 Micro Edition (J2ME) and a dedicated JAVA kind of software for embedded devices. Example: WirelessIRC.
MMS2	Multimedia Messaging Service (MMS) supports multimedia capabilities to deliver full-featured content and information, which includes text, images, sound, data and other multimedia formats.
WAP	WAP is a kind of global unified and open protocol standard that supports Internet contents and value-added services for mobile terminals. Example: Wireless application protocol.
Discard	Discard defines what are received and what are discarded, which used to debug the network status. Example: Discard protocol.

Application Name	Description
SMPP	SMPP defines the data format for communication between SMSC and ESME, provides the interface of TCP/IP, connects with SMSC and provides the services such as sending, querying and deleting short messages. Example: SMPP.
Skinny	Skinny, by the name of SCCP: Cisco Skinny Client Control Protocol, is a private Internet terminal control protocol. Example: Skinny.
EGP	Exterior Gateway Protocol
HTTPS	HTTPS is Hypertext Transfer Protocol over Secure Socket Layer, or HTTP over SSL.A protocol for accessing a secure Web server. -Example: HTTPS.
SyncML	SyncML is a mobile phone synchronization protocol. Example: www.Mobical.net.
HTTP_Download	HTTP_Download is the protocol of downloading file(.zip,.rar,.iso,.exe and so on) based on HTTP. -Example: Hyper-text Transfer Protocol (HTTP)
X400	X.400 is a group suggestions made by the International Telephone and Telegraph Consultative Committee (CCITT) which defined the basic standards for the message handling system.
FIX	The Financial Information eXchange (FIX) protocol is an electronic communications protocol initiated in 1992 for international real-time exchange of information related to the securities transactions and markets.
NetBios_Datagram_Service	NetBios, developed by IBM, defines the software interface and the standard method for supporting the communication interface between application programs and connection media. This is a sub-protocol of NetBios.
NetBios_Name_Service	NetBios, developed by IBM, defines the software interface and the standard method for supporting the communication interface between application programs and connection media. This is a sub-protocol of NetBios.
NetBios_Session_Service	NetBios, developed by IBM, defines the software interface and the standard method for supporting the communication interface between application programs and connection media.
RADIUS_Authentication	Remote Authentication Dial In User Service (RADIUS) is a remote dial-in authentication system provided by Livingston for authentication and billing of dial-in users. This is a sub-protocol of RADIUS. Example: FreeRADIUS.
RADIUS_Accounting	Remote Authentication Dial In User Service (RADIUS) is a remote dial-in authentication system provided by Livingston for authentication and billing of dial-in users. This is a sub-protocol of RADIUS. Example: FreeRADIUS.

Application Name	Description
CrossDomain	A cross-domain policy file is a XML document that grants a web client,permission to handle data across multiple domains. - Example: crossdomain.xml
FLV	Flash Video (FLV) is a container file format used to deliver video over the Internet.
CHARGEN	The Character Generator Protocol(CHARGEN) is a protocol for testing and debugging. Example: CHARGEN.
BACnet	BACnet - Network data communication protocol for building automation control.

## 2.4.4 Ip\_Protocol

IP layer protocol.

Application Name	Description
MPLS	Multiprotocol Label Switching (MPLS) is a kind of system for data exchanging and routing.
ICMP	ICMP is used to transmit messages between IP hosts and routers.
IGMP	Internet Group Management
OSPF	Open Shortest Path First
IP_IN_IP	IP-in-IP is an IP tunneling protocol, which is used to encapsulate the IP package into another IP package.
SCTP	Stream Control Transmission Protocol (SCTP) is a transport-layer protocol, which is similar to TCP and UDP.
RIPng	Routing Information Protocol next generation (RIPng) is a standard routing protocol. Example: RIPng standard protocol.
IPv6	IPv6 is a kind of network-layer protocol in the TCP/IP suite and is used to replace IPv4.

## 2.4.5 Network\_Admin

Network admin.

Application Name	Description
Corba	General Inter-ORB Protocol (GIOP) defines the structure and format of messages sent between different computers or platforms and is commonly used by CORBA components. Example: Corba/GIOP.
Syslog	Syslog can be applied to system logs. Syslog messages can be recorded in local files as well as sent to the servers receiving Syslog through the network. Example: Syslog.
Finger	Finger is a kind of real-time program to query users information in the Unix (this command is included in DOS). Example: Imaill.
Diameter	Diameter provides basic services for mobile IP and network access (for example, user sessions and charging) and supports the capability negotiation and error notification. Example: Diameter.
X224	X224 is a connection-mode transmission service agreement.
WebDAV	Web-based Distributed Authoring and Versioning (WebDAV) protocol is used for communication, which is based on HTTP1.1.
DTLS	Datagram TLS is a version of TLS, which can transfer datagram.
WuXianChengShi	WuXianChengShi provides wifi access.
BOOTP	BOOTP is a guide protocol used by a network client to obtain an IP address, sever main engine address from a configuration server, and put a pointed file into the storage, then operate it.
Identd	The Ident Protocol is a kind of standard protocol defined by RFC 1413 which can help users to identify a particularly bespoke TCP connection.
EPM	EPM (Endpoint Mapper) is a service for registering dynamic ports. Client can inquire the registered information in server by EPM interface.
MQTT	MQTT is a lightweight publish/subscribe messaging protocol.

## 2.4.6 News\_Group

Application about News.

Application Name	Description
Sohu_News	Sohu_News is a news website provided by Sohu.
XinHuaWang	XinHuaWang is a news website in China.
ZhongHuaWang	ZhongHuaWang provides mobile value-added services, online entertainment and Internet services in China.

## 2.4.7 CloudService

Cloud Service.

Application Name	Description
Google_App_Engine	Google application Engine is a platform for developing and hosting web applications in Google-managed data centers. It is a cloud computing technology that virtualizes applications across multiple servers and data centers.

## 2.4.8 Proxy

Network Agent allows a network terminal indirectly connect another network terminal service, it will help protect the privacy or security of Network Terminal and prevent attacks.

Application Name	Description
UltraSurf	UltraSurf is a kind of application running on an Internet client and is used to transparently access remote information by using the remote proxy server and customized encryption protocol. Example: UltraSurf.
Socks5	Socks5 belongs to the socks protocol suite, is a kind of open software standard developed by IETF for handling network security issues. Example: Socks5 proxy.
Stunnel_Control	Stunnel is a kind of free cross-platform software, supports the global TLS/SSL services and complies with the GNU protocol. Example: Stunnel cross-platform software.
Socks4	Socks4 belongs to the socks protocol suite. It is a kind of open software standard developed by IETF for handling network security issues. Example: Socks4 proxy.
TongTongTong	Tongtongtong is a kind of protocol conversion software based on proxy servers, which is popular in China. Example: Tongtongtong.
HTTP_Proxy	HTTP_Proxy is a server (a computer system or an application) that acts as an intermediary for requests from clients seeking resources from other servers.
Glype_Proxy	Glype Proxy is a free web-based proxy script written in PHP. It allows users to set up their own proxy websites. These proxy websites allow anonymous browsing and bypassing network filters at school, college or work.
Kproxy	Kproxy is a free web proxy, which allows to surf anonymously online.

Application Name	Description
Suresome	Suresome is one of the SSL encrypted proxies. Its main function is tunneling web browsing activities to avoid filtered by URL filtering.
Zelune	Zelune is a free web proxy script that can be downloaded from Zelune.net.
Megaproxy	The Megaproxy realizes the Web SSL VPN function through the concept of a secure application-level rewriting proxy so that it enables encrypted browser-based Internet connectivity through unsecured public or wireless networks.
Goproxing	GoProxing is a proxy server website that can be used anonymously.
Free	Freebieproxy is a browser-based web page agent for hiding the user search history.
Privoxy	Privoxy is a non-caching web proxy that provides advanced filtering functions to strengthen privacy, modify webpage data and HTTP headers, control access and remove ads and other web trashes.
CJB.NET_Proxy	CJB.NET is a website that provides domain names, website hosting, shell accounts and VPN services.
DeleGate	DeleGate is a proxy server that runs on multiple platforms (Unix, Windows, Mac OS X and OS/2).
Fourelle_Venturi_Proxy	Dual proxy is the user agent used by Starband, a satellite Internet service provider and possibly others as well. It is a by-product of their efforts to minimize satellite-link latency.
Safe_t.net_web_filtering	FANGCrawl is a Safe-t.net web filtering service. Safe-t.net provides a cleaner and safer Internet experience for your children, your family, your business, your workplace and the community you live and work in.
Finjan_prefetch	Finjan provides various web security solutions, including real-time and behavior-based malware prevention and holds patents for various web security technologies.
Oracle_Application_Server	Oracle Internet Application Server provides a single integrated packaged solution of various middleware, including Oracle Containers for J2EE, Oracle Web Cache, Oracle HTTP Server, Oracle Forms, Oracle Reports, Oracle Portal and Oracle Discoverer.
MarketscoreInternetAccelerator	Ossproxy.exe is an executable application belonging to Marketscore ossproxy and supporting Internet acceleration. This is a non-essential process that can be disabled or enabled based on user preference.

Application Name	Description
PureSight	PureSight helps you protect your children from cyber bullies, predators and adult-oriented websites, so that they can enjoy a safe Internet environment.
Semaforo	Semaforo.net is a useful application that blocks access to websites containing pornography, drugs and violence and parents can limit the time of children surfing on the internet.
Squid_Prefetch	Squid is a proxy server and web cache daemon. Although primarily used for HTTP and FTP, Squid includes limited support for several other protocols, including TLS, SSL, Internet Gopher and HTTPS.
SCAVR	SCAVR is a kind of free antivirus software used by Squid proxy to secure your home or enterprise network web traffic. It is the most efficient Squid Redirector and ICAP service antivirus tool for HTTP traffic.
SurfControl_Web_Filtering	SurfControl Web Filter provides the tools you need to understand and manage your Internet usage in a flexible way that best suits the needs of your business.
Watchfire_WebXM	Watchfire WebXM is a content analysis tool from Watchfire to analyze sites in terms of slow page loading rate, purchase checkouts, accessibility, searchability and broken links; privacy compliance; and website standards compliance.
Verso_NetSpective_WebFilter	Verso NetSpective does a good job of web filtering and can perform some intelligent blocking of IM, peer-to-peer and streaming-media traffic.
WebRACE	WebRACE is a prototype of the HTTP retrieval, annotation and caching engine developed in Java. It is the WWW agent-proxy of eRACE.
Viking	Viking is a free/open source program to manage GPS data.
Novell_Border_Manager	BorderManager is a multi-purpose network security application developed by Novell, Inc. BorderManager is designed as a proxy server, firewall and VPN access point.
Novell_iChain_Cool_Solutions	Novell iChain is an integrated security solution that offers secure authentication and access to portals, web-based content and Citrix thin client services.
Avirt_Gateway	Avirt Gateway provides the security of an application level firewall to protect your LAN from attacks and with features like reverse bridging, you can even protect your web and email servers.

Application Name	Description
CERN_HTTPD	The CERN httpd can serve as a proxy (a server on a firewall machine) that provides access for people inside a firewall to the outside world. When running as a proxy, CERN httpd may be configured to do caching of documents, resulting in faster response.
Google_Wireless_Transcoder	Google Wireless Transcoder (GWT) was promoted in November, 2006 for removing all JavaScripts and other ads from the Google loading page and send the simplified version to mobile users.
Covac_UPPS	Covac Software UPPS is a private web crawler (robot) used for different tasks, such as running errands on particular sites or harvesting certain type of information or files (for example, scripts or programs).
Synapse_Apache	Apache Synapse is a lightweight and high-performance enterprise service bus (ESB). Powered by a fast and asynchronous mediation engine, Apache Synapse provides exceptional support for XML, web services and REST.
HideMe	HideMe.in is a free anonymous web based proxy service. With HideMe.in you can browse your favorite websites anonymously, even from behind a firewall with blocked ports.
Paros	Paros is a security tool for web application vulnerability assessment.
Hatena_Mobile_Gateway	Hatena Mobile Gateway is a proxy for handheld devices/mobile clients/RSS/web page screenshot robots.
Anonymous_Web_Proxy	An anonymous open proxy server that allows users to conceal their IP address and thereby helps preserve their anonymity and maintain their security while browsing the web or using other Internet services.
Web_Proxy	Web_Proxy is a free web proxy, which allows to surf anonymously online. eg: hidemyass.com anonymouse.org

## 2.5 General

### 2.5.1 General\_UDP

UDP applications.

Application Name	Description
General_UDP	Unclassified UDP traffic

## 2.5.2 General\_TCP

TCP applications.

Application Name	Description
General_TCP	Unclassified TCP traffic

## 2.5.3 Other

In addition UDP, TCP applications

Application Name	Description
Error_Packets	Error packets.
Generic	This protocol is used to identify the unknown traffic.
BotNet	Botnet means by using one or more transmission methods to make massive main engines infected with bot virus in order to form a one-link-multiple controlled network between the controller and the infected network.
General_Other	Unclassified non-TCP/UDP traffic
